Trafficked Children, Bodies, Weapons Found on Evergreen Ship Blocking Suez Canal

By Judy Byington as reported in 'Before It's News', April 2, 2021

Over a thousand trafficked children and dead bodies have been rescued out of shipping containers in the Suez Canal by US Navy Seals. Sources say that as of this writing, children were still being rescued and bodies discovered in Evergreen's 18,000+ containers. The containers were on an Evergreen Corporation ship that blocked the Canal from Tues. 23 March to Mon 29 March, causing billions in lost revenue to shipping companies internationally.

The Seals also found Weapons of Mass Destruction on the six story high vessel – which were believed destined to start a war in the Middle East.

Finally by Tues. the Evergreen cargo ship was loosened and taken to Bitter Lake in Egypt. By order of the Egyptian President, the containers were taken off the ship and searched by US Navy Seals.

The Japanese-owned, Taiwanese-operated ship of Evergreen Corporation was actually co-owned by Walmart and the Clinton Foundation – known for it's international child trafficking ring. The children were said ordered out of magazines like Wayfair by pedophiles

Saving pollinators from an imaginary bee-pocalypse

Honeybees are doing OK, despite varroa mites, the Covid-driven economy and other problems

By Paul Driessen

A torrent of media stories from 2013-2014 presented frightening tales of "unprecedented" colony collapse disorder (CCD) among honeybees, conjuring up visions of a "bee-pocalypse" and "a world without bees," a world in which flowers and agriculture would be decimated.

Many articles blamed neonicotinoid pesticides, while others added climate change and biotech (GMO) crops as likely culprits. Some mentioned Varroa destructor mites and various viruses and diseases as possible causes. Virtually none suggested that organic food industry chemicals could also be implicated in bee deaths. The overall tone was "deep concern," bordering on hysteria. But it sold papers and air time.

Over the next few years, the number of US honey-producing bee colonies (hives) generally and gradually increased, though with bumps in the road. There were 100,000 more hives in 2014

Deep State Dr. Fauci Mysteriously Earned $9,000,000 in 2020

By Keith Richards, Real Raw News, April 12, 2021

Deep State Dr. Anthony Fauci had a lucrative 2020, netting $9,000,000 in "miscellaneous income," according to an NIH insider who told RRN that Fauci bragged about his newfound wealth and said he had earned enough cash in 2020 to retire, buy a private plane and jet set around the world.

Fauci is hardly a pauper; his annual salary at the NIH is $417,000. He was the highest paid federal employee in 2019, with a salary greater than the president's. Additionally, 2019 public records estimate his net worth at approximately $2,700,000, a hefty nest egg for

Teachers' Unions Treat Citizens as Commodities that Pay Taxes

By William L. Kovacs

This article started out to be a well-researched effort to identify all the legal avenues available to parents to force teachers unions and the teachers we pay every week, back to teaching our children in a classroom. My research found there is very little that parents/taxpayers can do to make teachers work for their money. Protecting teachers is federal sovereign immunity, state sovereign immunity, and state qualified immunity from suit unless there is some form of sexual assault involved. Also, there are unions and collective bargaining agreements that exclude parents from any voice in their child's education. Simply, we parents/taxpayers are merely commodities that the teachers and their unions need so they can take our money whether they work or not.

I live in Fairfax County, Virginia and over half of my hefty tax payment goes to the $2.3 billion the county spends on schools and teachers each year. From a budget perspective, that is five times more than what is spent on public safety, fifty times more than on the administration of justice, and ten times more than on all of the health, welfare, community, and

Navy SEALS Arrest Hillary Clinton

By Michael Baxter, Real Raw News, March 4, 2021

The chant "lock her up" has finally seen fruition.

US Navy SEALS loyal to Donald Trump raided Hillary Clinton's Chappaqua, NY estate and arrested her on charges of treason, destruction of government property, and aiding and abetting the enemy, Real Raw News has learned.

The arrest happened on Tuesday night, according to a source in Trump's orbit, only hours after Trump had spoken to Rear Admiral Hugh W. Howard at US Special Operations Command and given

U.S. Special Forces Arrest John Podesta and Huma Abedin

By Michael Baxter of 'Real Raw News' April 4, 2021

John Podesta **Huma Abedin**

Former Clinton Staffers Huma Abedin and John Podesta will soon have a new home at the Guantanamo Bay detention facility, where they, like Clinton, will face a military tribunal to answer for heinous crimes committed against America and its people.

Steve's Say . . .

Just Trying to Get to the Truth

By Steve Welcenbach

Many of you readers, when you see this edition of Reality News, may find some of the information provided incredulous. And why so? Maybe its too good to believe, that you fear disappointment should it turn out to be inaccurate or even fake. Or maybe you're of the group that asks' "Why haven't I heard this elsewhere? This is such huge news!"

Fear is the tool of Satan. His perversion of language, half-truths and outright lies sow the seeds of division which grow into harassment, demonization, violence, extortion, blackmail, and murder. He imprisons individuals by uncovering their weaknesses through his temptations then utilizes their failures to capture them with the threat of exposure. Embarrassment, ridicule, the loss of a job or exclusion from some group petrifies many people from fighting back or even thinking there's a way out. People become despondent and apathetic, and some eventually give in all the way to despair, the Devil's ultimate victory over one's soul.

So one of our fellow patriots commented how "brave" I was after informing him I planned to publish the reports of the arrests of John Podesta, Huma Abedin, and Hillary Clinton along with the subsequent pieces recounting the first couple of days of her military tribunal. Brave? What's so brave about putting forth other people's work and effort at reporting what's really going on in the world?

But how do you know it true? I guess I truly don't know if it is, but then again, when do we ever know for sure what we hear or read about is true? We've certainly seen almost everything coming at you from mainstream media (MSM) sources are NOT true, from the Russia hoax, climate change nonsense plus all the hype and fear-mongering of the COVID plandemic. All confirmed fake news!

Here's what I do know for certain. All MSM sources are just big lie generating machines, propaganda arms of the New World Order (NWO) cabal. So the fact that a story does NOT appear in the MSM elevates the credibility of the source enormously as I see it. Secondly, when the "Fact Check" Soros funded lie machine targets a story as untrue, that essentially confirms that it's true in my book.

Just look at all the COVID stuff they debunked as untrue which now the same sources confirm is true. Many pieces we published here in March, April and May, like the hydroxychloroquine treatment, the false virus origin from the Wuhan wet market, and masks as unviable preventative measures were deemed false by these liars. All confirmed today as 100% spot on.

Take the stories for what they are. Do you really think that NWO state controlled media would really announce Hillary's arrest and cover her trial by military tribunal? What do you think would happen if the MSM announced the arrests of Podesta and Abedin? Don't you think it might end the charade of the fake presidency and federal government of the treasonous usurpers? The reasoned conclusion: No MSM outlet would ever put forth this information unless forced.

Apparently they're not forced yet. But that day will come. It has to. Unless of course they're gone. Or the NWO actually gains control of America and thus the world. That would require US military support of the fake regime. They don't have it according to several reports and sources I deem reliable. We'll see soon enough.

So whatever you think is true, prepare yourself the best you can for what's coming. Word on the street portends more violence from the BLM/Antifa brownshirts. The corrupt court system, top to bottom, cannot produce justice anywhere. Legislators at all levels appear bought and paid for by foreign and corporate interests. The DOJ, CIA and FBI continue to demonstrate their status as criminal enterprises working for their NWO bosses as they've been doing for decades.

Maybe I put forth these pieces more out of hope than logic. Maybe. But until anyone produces Hillary Clinton or John Brennan or Huma Abedin or John Podesta IN THE FLESH, not in a social media post or an Opera interview or some other staged media platform, where we can check fingerprints and confirm no facemasks present, I will aver they're all at the GITMO hotel, right where they belong, getting ready to cleanse their souls with true repentance or make the final payment to the Dark Lord who showered them with power and money.

Maybe this "brave" act brings forth leftist vitriol leading to a wider discussion and investigation into if this is really happening. I think that outcome would be well worth my investment in credibility.

Always remember, Satan cannot bear the sight of the Lord God. He involuntarily bows down before Him anytime The Lord God dictates. And anytime we people of faith invoke God's Name or that of His Son our Lord Jesus Christ the Savior, we bring forth all of the power and protection of the Lord God himself. Prayer to the Lord makes the Devil and his demons flee. They cannot bear it. Prayer is our sword against the armies of darkness. Use it. Cleave your pathway through this world to the place Christ has prepared for you when your work here is complete.

"Do not let your hearts be troubled. Trust in God; trust also in me." John 14:1

"I choose gratitude and forgiveness over anger and bitterness. This allows me to see and appreciate the beauty and blessings in most everything."

- page 182 in "Something Beautiful is Going to Happen…"

Our Vision

We aspire to a world in which people, made in the image of God, reconciled to Him by Jesus Christ, and reflecting God's own creativity, work together to enhance the fruitfulness, beauty, and safety of the Earth, enabling more and more of our neighbors to enjoy good health, long life, freedom, justice, and spiritual and material abundance, for the glory of God and the good of our fellow man, thus fulfilling the two Great Commandments to love God and love our neighbor.

Our Mission

We seek to magnify the glory of God in creation, the wisdom of His truth in environmental stewardship, the kindness of His mercy in lifting the needy out of poverty, and the wonders of His grace in the gospel of Jesus Christ.

Our Identity

A coalition of theologians, pastors, ministry leaders, scientists, economists, policy experts, and committed laymen, the Cornwall Alliance is an evangelical voice promoting environmental stewardship and economic development built on Biblical principles.

Schedule a Speaker

Dr. Beisner and many Fellows, Adjuncts, and Contributing Writers are available to speak for churches, seminaries, universities and colleges, schools, and other groups. To schedule a speaker, email Calvin@CornwallAlliance.org.

Environmental Activism as Carbon Imperialism: Nightmare for the Poor

By Vijay Jayaraj

Environmental activism can delay or even stop development projects in developing countries. Not all of it is wrong, but more and more of it is, especially concerning hydrocarbon-based power plants in developing (and developed) countries.

I live in India. With a population of 1.3 billion, nearly 300 million live in poverty, excruciating poverty compared to Western living standards.

India is in a race against time to achieve economic progress. In the past three decades its economy has grown by leaps and bounds, lifting hundreds of millions out of poverty. Yet it has a long way to go before it can become like nations in the developed West.

One of the chief hurdles is bringing reliable, affordable electricity to all the people of India. Uninterrupted electricity is still a luxury that few Indians enjoy.

Though predominantly agrarian, India is experiencing massive growth in its industrial and manufacturing sectors. The service sector and information technology sectors are also booming. The country's energy sector is the backbone of its economic growth.

But the country has been facing constant challenges to its energy goals. Hydrocarbon projects in particular face hurdles from well-organized environmental activists backed by Western funders.

Blocking Fossil Projects Delays Poverty Alleviation

A number of developmental projects in India are currently on hold despite clearance given by the country's Green Tribunal, an Indian equivalent of the U.S. Environmental Protection Agency.

One case is the hydrocarbon project at Neduvasal, located a few hundred miles from my native town in Tamil Nadu. Despite clearance by the Green Tribunal, protests continued, and the project is in limbo.

Several other key energy projects have been delayed or abandoned because of strong environmental activism in this particular part of India, thus depriving the region of economic progress.

Among them were a titanium dioxide project, a nuclear power project, a particle physics research project, a copper manufacturing project, and a gas exploration project. Some of these were given a go-ahead by India's Supreme Court and considered safe by technical experts, yet they were delayed or remain on hold because of the protests.

It takes lots of effort and time to raise people above the poverty line. Sometimes anti-developmental protests—by environmental groups funded by radical elements abroad—cancel the much-needed developmental projects quite easily through grassroots misinformation campaigns.

The saddest thing about this is that the impact of these economic hurdles is much more significant in developing countries where they can impact the poor and those very close to the poverty line. A few months of COVID-19 lockdown in India sent millions back into extreme poverty, in which they cannot even afford three meals a day.

While small environmental groups and their regional protests hamper progress in this manner, large international ones promote environmental and energy policies that have a much bigger impact on the economy.

"Carbon Imperialism"

International climate policies, especially the Paris Agreement, have the potential to disrupt the Indian economy. But Indian authorities have always opposed imposition of restrictive energy policies by the anti-fossil establishment in the West

India's reservation about this was quite well expressed by India's former Chief Economic Adviser to the Prime Minister, Arvind Subramaniam. Recognizing the subtle efforts of the United Nations and Western powers to subdue fossil fuel use in India, Subramaniam called their collective efforts "Carbon Imperialism."

That is a quite a thing to say for a person from a country that has endured the harshest form of colonialism. Subramaniam identified the imposition of carbon taxes as something unrealistic, especially when Western powers achieved economic success for themselves by fully using the very same fossil fuel-generated energy they now condemn.

Besides, no substitutes can make up for the lost energy from fossil fuels. Renewables are more expensive and less reliable.

Subramaniam warned the country, "Renewable sources come with hidden costs, which should not be overlooked in our headlong embrace with renewables." He continued: "Coal will remain and should remain. The time is ripe for creating a green and clean coal coalition."

His policy views were re-confirmed in 2020 when the country's economic report reconfirmed reliance on fossil fuels to achieve meaningful progress. In fact, recently India announced that it will invest $55 Billion in clean coal (high technology, reduced emission) projects over the next ten years.

The national government has been phenomenal in warding off the pressure from the West and continues to invest in affordable, abundant, reliable energy sources. But the grassroot protests need to be addressed, and for that the radical environmentalism and its overarching roots must be disabled. How? By informing the general public of the harms it brings, and thus depriving it of the popular support without which it cannot succeed.

For the 300 million poor in India, the environmental groups—funded by radical elements in the United States and Europe—are the biggest obstacle to becoming middle-class households—healthy, prosperous, and long-lived.

This article was originally published on MasterResource.org.

Which Requires More Materials—Using Energy from Fossil Fuels, or from Wind and Solar?

You burn up a tank of gasoline in your car and you have to replace it. But you use up the charge in your Tesla's battery, and you just recharge it. Which uses up more resources?

Seems obvious, doesn't it? But it's not.As energy expert Mark Mills explains in Mines, Minerals, and "Green" Energy: A Reality Check, building wind turbines and solar panels to generate electricity, and batteries to power E-vehicles, requires more materials than building machines using fossil fuels to deliver the same amount of energy. How much more? You'll be shocked to find out.

How many smartphone batteries would contain the same amount of cobalt found in an electric car? How many smartphones would contain the same amount of plastic found in a single wind turbine's blades? How many smartphones would use the same amount of glass found in a solar array sufficient to power a single data center?

Few people can answer those questions. Yet they're crucial to all kinds of energy policy.

You can learn those answers, and lots more, by reading Mines, Minerals, and "Green" Energy. Once you've learned them, you can urge your elected representatives to embrace sensible energy policy, not the nonsense of "renewables." You can learn those answers, and lots more, by reading Mines, Minerals, and "Green" Energy. Once you've learned them, you can urge your elected representatives to embrace sensible energy policy, not the nonsense of "renewables."

Mark Mills will discuss Mines, Minerals, and "Green" Energy with me on From the Stacks, our livestream program on YouTubeand Facebook, Tuesday, April 13, at 7 p.m. Eastern Time/6 p.m. Central Time. View it live and you can post your questions, which we'll try to answer in real time! Ask your friends to join you!

Meanwhile, act quickly to request your FREE copy, which we'll gladly send as our way of saying thanks when you make a 100% tax-deductible donation of literally ANY SIZE. Supply is limited, and the offer ends April 30, so act quickly. To request your copy, simply make your donation of any size through our secure online giving page, by mailing your check to Cornwall Alliance, 3712 Ringgold Rd. #355, Chattanooga, TN 37412, or calling us at 423-500-3009 by midnight on April 30. In any case, mention Promo Code 21-04 or Mines, Minerals, and "Green" Energy: A Reality Check.

When giving online you can put the code in the comments box on the second page of our donation form.Please note we do ask international donors to pay for shipping of the free gift. Offer valid only while supplies last.

The Heartland INSTITUTE
Ideas that empower people

The Heartland Institute is a national nonprofit research and education organization devoted to discovering, developing, and promoting free-market solutions to social and economic problems.

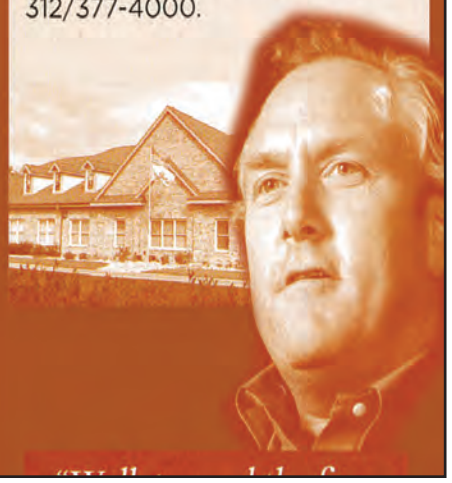
ANDREW BREITBART FREEDOM CENTER AT THE HEARTLAND INSTITUTE

On March 1, 2016, on the fourth anniversary of his death, The Heartland Institute dedicated the public meeting space in its new home in Arlington Heights in honor of Andrew Breitbart.

The Andrew Breitbart Freedom Center is a state-of-the-art meeting facility with seating for 75. Events are scheduled to take place every week in the space, featuring authors of new books, freedom activists and thinkers, and civic and business leaders.

"Andrew Breitbart was a genuine American hero," said Joseph Bast, president of The Heartland Institute, in a video announcing the dedication. "He inspired millions of people to stand up and speak the truth about what is happening in America. We could not be more pleased to have his name forever affixed to The Heartland Institute. We are honored that his family and friends believe this is a suitable addition to his legacy."

For more information about the Andrew Breitbart Freedom Center, please contact Nikki Comerford at ncomerford@heartland.org or 312/377-4000.



Lions are under threat in Africa

By Craig Rucker

Where once the King of the Jungle roamed almost the entire continent of Africa, today its range has shrunk to only about 660,000 square miles – a loss in habitat of 94%.Conservationists fret that there are only 25,000 remaining in Africa and have therefore listed them as "vulnerable" to extinction at the IUCN.

Will you help CFACT undertake a project that is trying to make a difference to save Lions in targeted villages in Tanzania and Kenya? To help make an impact on behalf of the free-market environmental cause, the Committee has partnered with wildlife conservationist Patricia Vaughn. She has been utilizing a technique to prevent clashes between humans and lions that employs a system of lights to keep lions away from livestock.

The reason why Vaughn's private stewardship initiative is important is because lions often come into dangerous contact with people and their livestock in search of food. If the cats happen to prey on a villager's farm animal, they may be killed in retaliation—often by poison.

To prevent this from happening, Vaughn and her team travel to "bomas" (livestock enclosures) around Tanzania and Kenya, setting up light fixtures that strobe in a fashion that makes the lions stay away. The flashing and blinking lights are small enough that they can be powered by solar for up to five years.

As soon as the lights are set up, lion appearances near the bomas diminish significantly, as do retributions and clashes with villagers.

It's a win-win for people and nature!

CFACT has already equipped Vaughn's team with a number of these lights.She's off putting them up in Tanzania as I write this letter. The villagers love them and are fully onboard … because they work!

But as you know, Africa is a big continent, and our work has only begun … we need to do more.

Please send your most generous contribution today to help CFACT purchase thousands of these "Lion-saving" lights for use by Vaughn and her team to continue their important work protecting Africa's Lions. Your financial gift of $15, $25, $50 or even $100 or more will go a long way toward making a difference not just for the lions, but for villagers as well.

Thank you for your time and interest. I'm confident we can count on you to help us make an impact on this most noble cause!

Antarctica's inconvenient volcanoes

By Craig Rucker

Scientists have thoroughly documented the existence of underwater volcanic activity beneath Antarctica's Pine Island.

Yet those volcanic fissures somehow always seems to slip the mind of the global warming-Left.

Under the heading "climate change," the folks over at Earther/Gizmodo write that the "First-Ever Observations From Under Antarctica's 'Doomsday Glacier' Are Bad News."

Bad news or not, the story about an unmanned submarine measuring water temperature beneath Thwaite's Glacier and the potential impact on sea level leaves out a crucial point. The warm water beneath the glacier is majorly impacted by volcanic activity. There is a tectonic fissure directly below Antarctica's Pine Island ice shelf.

Scientists at the University of Texas at Austin concluded that, "the cause of the variable distribution of heat beneath the glacier is thought to be the movement of magma and associated volcanic activity arising from the rifting of Earth's crust beneath the West Antarctic Ice Sheet."

Many more scientific publications have weighed in on the geothermal origins of the warm water beneath the glacier.

Just how much doom will flow from the volcanic warm water beneath Thwaite's Glacier is a worthy topic for further study. However, alarming stories under the heading "climate change" that omit the geothermal origin of the warm water are deliberately misleading attempts to boost the global warming narrative.

Scientists have yet to reveal any amount of regulation, taxation and redistribution sufficient to cool a volcano.

ICSC-Canada begins daily "Climate Change Minute"

Tom Harris

Dr. Jay Lehr

By Tom Harris and Jay Lehr

Dear friends,

Things are beginning to roll at our new not-for-profit International Climate Science Coalition – Canada (ICSC – Canada):

• Our new site, www.icsc-canada.com, is now operational and, every week day from now on, a new "Climate Change Minute" video will appear at the bottom of our home page. The "Minute" for March 16 is there now. You can view it directly at https://www.youtube.com/watch?v=bdOSx3AE2kE. Here is a sneak preview of the "Minute" videos that will be on the home page of the ICSC-Canada site at mid-day (ET) on Wednesday and Thursday this week:

March 17: (on polar bears): https://youtu.be/CzX2vxG9U8k

March 18: (on extreme weather): https://youtu.be/za6lmGfd0WA

To view our new Climate Change Minute video any weekday after that, just go to our home page at www.icsc-canada.com. I welcome suggestions for good topics for the "Minute" and hope you can share these short videos widely as they appear on our home page.

• ICSC – Canada has had its first board meeting and approved our bylaws, and other internal logistics to get us going. You can read about our board members, plus our researcher, at https://www.icsc-canada.com/our-team .

The original ICSC continues, of course, and we are getting a good number of radio interviews in the U.S. For example, I have a half hour radio interview scheduled on the Andy Caldwell Show out of California today at 7 pm ET. You can listen live at http://www.theandycaldwellshow.com/.

My podcast at https://www.iheart.com/podcast/966-exploratory-journeys-with-48576506/ is also going nicely and I just noticed that Audible has now picked it up. You may want to listen to some of my latest 30 minute interviews as below. I hope you can share these broadly as well:

• March 15: with Dr. John McLean of Australia about the problems with the surface temperature record: https://www.iheart.com/podcast/966-exploratory-journeys-with-48576506/episode/is-using-temperature-history-to-boost-79652987/. Here is Dr. McLean's book on the topic: https://robert-boyle-publishing.com/product/audit-of-the-hadcrut4-global-temperature-dataset-mclean-2018/

• March 4: with Dr. Jay Lehr of Ohio about some of the latest news in climate science: https://www.iheart.com/podcast/966-exploratory-journeys-with-48576506/episode/tom-discusses-the-latest-news-in-78484761/ . Here is Dr. Lehr's book with Terigi Ciccone: https://www.amazon.com/Hitchhikers-Journey-Through-Climate-Change-ebook/dp/B086R49RS6

• March 1: with Dr. David Wojick about energy realities and what really happened in Texas: https://www.iheart.com/podcast/966-exploratory-journeys-with-48576506/episode/tom-speaks-with-dr-david-wojick-78329297/

• February 10: with Dr. David Wojick about the problems with batteries for wind and solar power: https://www.iheart.com/podcast/966-exploratory-journeys-with-48576506/episode/the-problems-with-batteries-for-wind-77486066/

• January 14: with Dr. Susan Crockford about the real condition of the polar bear population, part 2: https://www.iheart.com/podcast/966-exploratory-journeys-with-48576506/episode/the-truth-about-polar-bears-76276556/

• January 7: with Dr. Susan Crockford about the "Polar Bear Catastrophe that never happened" (which is the title of her new book at https://www.amazon.ca/Polar-Bear-Catastrophe-Never-Happened/dp/0993119085) – part 1: https://www.iheart.com/podcast/966-exploratory-journeys-with-48576506/episode/the-truth-about-polar-bears-75982422/

India ignores media preaching on 'net zero carbon'

First-world 'experts' have no business chiding nations that prefer prosperity over poverty

By Duggan Flanakin

India is just one of an increasing number of "developing" nation which have recognized that the mad rush toward a "net zero carbon" economy does not serve the interests of their ordinary citizens. These countries are also waking up to the fact that serving the public interest necessitates major increases in abundant, affordable, reliable, mostly fossil fuel electricity to power their burgeoning economies.

When first-world reporters write about the developing world's ongoing love affair with fossil fuels, their reports are "not necessarily the news!" Instead, they editorialize in nearly every story about the "sad" reliance of India, China, African nations and others on "the highest polluting resource" – coal.

The sirens of cyberspace have embraced as gospel the diktat of the Paris climate accord that countries must cut their greenhouse gas emissions to "net zero" as quickly as possible. Otherwise, they chirp in unison, the Earth will soon become a burning inferno from superheating caused by CO2 released from burning fossil fuels.

The "erudite" have decreed that any "climate change" will necessarily bring unspeakable horrors upon us all. The zeal for climate stasis by those currently at the top of the pyramid is such that some have even proposed permanently darkening the sky to stop the imagined heat from killing us! That highly risky endeavor could impact all life on Earth. (In reality, a far worse future would be a colderclimate with less atmospheric CO2, because that would reduce arable land, growing seasons and plant growth.)

But the elitists in Washington, Brussels and New York City have a big problem. China, the world's leader in CO2 emissions, and India, already Number 3, are not kowtowing to their demands. Meanwhile, African countries are planning to build more than 1,250 new coal and gas-fired power plants by 2030. And neither UN "peacekeeping forces" nor even the increasingly "woke" US or EU military can be deployed to force these nations into "compliance," er, submission.

Recognizing this awkward reality, climate elitists are now relying on the old adage that "the pen is mightier than the sword." Public shaming has worked well with first-world corporations, so why not use it worldwide?

A necessary first step toward restoring "the right order of things" was President Biden's fulfilled promise to immediately rejoin the Paris climate accords and subject the US economy to its whims. To stem the cries of "unfair trade advantages" for the world's two most populous nations, the "masters of the universe" unleashed the media hounds to cajole, beg and virtue-signal the "lesser" peoples into line.

For India, the latest round of shaming has already begun. On March 17, Bloomberg Quint (Bloomberg's Indian affiliate) reporters Archana Chaudhary, Akshat Rathi and Rajesh Kumar Singh announced that "Top Indian government officials are debating whether to set a goal to zero out its greenhouse gas emissions by mid-century." (At no point did the intrepid reporters actually name any of these officials.)

The Bloomberg trio further claimed that "officials close to Prime Minister Narenda Modi" were drawing up plans to achieve the net-zero target by 2050 – a full decade ahead of China – which says it intends to finally cap its CO2 emissions at whatever level they have reached by 2060, after four more decades of growth. Even so, "Modi will also need to navigate potential pushback from inside his government" in order to achieve the targets demanded by such dignitaries as US "Climate Envoy" John Kerry.

In a follow-up article six days later, Singh and Debjit Chakraborty cited a new report that proclaimed "India must phase out its coal-fired power plants" in order to achieve net-zero greenhouse gas emissions by 2050. And two days after that, Singh claimed that India is "under growing pressure to improve its climate commitments, which have forced government officials to debate a possible net-zero emissions target." Moreover, he warned, Secretary-General Antonio Guterres has called investments in fossil fuels "a human disaster and bad economics." [emphasis added]

Not surprisingly, Singh's March 25 report was also full of "bad" news. India has set in motion its biggest ever auction of coal mines in the country "despite the fossil fuel's key role in contributing to global warming." The auction opens coal mining to private firms and thus dislodges the state monopoly over the domestic coal market. That, he asserted, "sends mixed signals at a time when the world's third-biggest emitter of greenhouse gases needs to shed its dependence on coal."

Despite the preaching, Singh admitted that the Indian government sees private coal mining as a way to create jobs in an economy devastated by the COVID pandemic. Coal mining projects, he conceded, will bring in new investments and boost socio-economic development in mining regions (and beyond). He even cited Tim Buckley of the Institute for Energy Economics and Financial Analysis, who recognizes that "India can't just stop using coal overnight." Coal is still "a necessary evil" for the country.

There is another problem with the Bloomberg version of India's alleged quest for Net Zero.

Vijay Jayaraj, research associate for developing countries at the Cornwall Alliance for the Stewardship of

Creation, chided the Bloomberg trio for urging India to banish coal. Noting that "No official sourceshave confirmed that New Delhi is devising a Net-Zero target for 2050," Jayaraj derided "the anti-fossil lobby, which includes journalists," for trying to pressure developing countries into shutting down their fossil industry – thereby condemning billions to poverty, limited opportunities and whatever minimal living standards can be sustained by expensive, intermittent wind and solar power.

India, says Jayaraj, is building a fossil-fuel-dominated energy sector, not a green one. The country is also seeking to curtail inflation and secure additional oil imports at a time when "anti-fossil journalists have ushered in confusion by claiming the Indian government is now aiming to achieve Net-Zero emissions by 2050." Predictably, Bloomberg did not respond when asked by Jayaraj just which "officials close to" Prime Minister Modi they were citing.

Indeed, unfazed by the sirens, India is moving ahead on a second round of commercial coal mine auctions, with 67 sites up for bids. The nation needs a constant increase in coal production to support its growing coal-fired

Saving Pollinators

continued from page 1

than in 2013, and numbers went on a slight roller coaster in subsequent years, up and down in the same range as 1993-2012.

A recent US Department of Agriculture honey report could ignite new concerns, especially in conjunction with recent data that show a 4% decline in US bee colony numbers: 2,812,000 in 2019 versus 2,706,000 in 2020. This time, though, the more likely cause is the Covid-driven 2020 economy

Indeed, honey production dropped 6% but honey prices rose slightly to offset some of the lower production and sales. Almond grove and other pollination revenue went down 18% and other revenues fell even more sharply. But it's also interesting that that there were 1,000 fewer apiary workers in 2020 than the year before – and spending on Varroa and other bee disease control declined almost 30% (the same drop as expenditures on syrup and other bee food). That largely explains the lower hive numbers.

(Also interesting, four states – Minnesota, Montana, North Dakota and South Dakota – accounted for 38% of all US honeybee colonies in 2020, many of them reliant on canola flowers. Their honey averaged $1.60 per pound in 2020, versus $6.30 per pound for boutique honey from four states – Illinois, Kentucky, New Jersey and Vermont – that collectively had just over 1% of all US hives.)

Even more fascinating and instructive is the trajectory of US honeybee colony numbers over the past five decades, showing no connection to neonics, other pesticides or much of anything else.

The all-time-high for US honeybee hives was in 1977 (4,323,000 colonies), and it was 6% higher than in 1972. The total then plummeted 25% by 1986 – and hasn't been above 3,000,000 since 1992. The all-time-low for US honeybee colonies was 2,342,000 in 2008 – five years before the bee-pocalypse!

It gets even harder to decipher recent bee problems when you realize that Varroa mites didn't arrive in the United States until 1987, and neonic use didn't begin until the mid-1990s. But US honeybee colony numbers have been consistently in the 2.5-2.9 million range, with just a few dips to 2.4 million.

Varroa mites are nasty threats largely because the American-European honeybee (unlike its Asian cousin) had no natural defenses against them. The mites bite into bees and bee larvae, feed on bee "blood," and create pathways into bees for at least 19 viruses and diseases. Tracheal mites, Nosema intestinal fungi, parasitic phorid flies, the tobacco ringspot virus and other pests can also cause significant colony losses.

Beekeepers can accidentally kill entire hives, trying to address such problems, but professionals have become much better at getting treatments and doses right than have most hobbyist beekeepers.

As their name suggests, neonicotinoid pesticides are derived from synthetic nicotine. Some 90% are applied as seed coatings that dissolve and get absorbed into plant tissues as crops grow; they target and kill only pests that feed on the crops. Neonics also largely eliminate the need to spray with other insecticides that can easily harm bees and other beneficial insects. These innovative chemicals have nevertheless been targeted by anti-pesticide groups, and by organic food producers that themselves use various crop-protecting pesticides that are harmful or lethal to honeybees and wild bees.

Among those organic farm chemicals, pyrethrin neurotoxin pesticides are highly toxic to bees, possible human carcinogens – and no longer derived from flowers, but synthetically manufactured. Nicotine sulfate can partially paralyze bee wings and legs, and can be poisonous to humans. Copper sulfate is highly toxic to bees, deadly to fish, bio-accumulative in soil and water, and all-around nasty.

Changing agricultural and land-use practices, also play a role, including more houses, factories and highways replacing flowering trees and open fields of plants that provide pollen and nectar for bees.

However, when they see lurid photos of dead bees, people should understand that bees have very short lives. Exactly how long depends on their species and sex, the climate where they live, food availability, overall bee health in the hive – and what time of year bees emerge from their cell.

Queen bees can live 2-3 years, even 4 years or more; they lay up to 2,000 eggs per day. Male drone bees live several months during warm weather, but die after mating with a queen, because their reproductive organs are ripped from their bodies in the process! Female worker bees live only 4-6 weeks, because foraging for food takes them miles every day and wears their bodies out quickly; they live up to 20 weeks in the winter, when their job is keeping the hive warm.

Average honeybee colonies hit peak population counts of 50,000-60,000 in June – but those numbers plummet rapidly in autumn, as flowers disappear and cold weather sets in. So dead bees in and around hives is normal (but excellent fodder for fear-mongering).

As to "colony collapse disorder" (sometimes called "disappearing disorder"), major bee die-offs were reported in Ireland as far back as 950 AD! The first recorded US case of worker bees suddenly abandoning hives full of honey occurred in 1869; researchers reported 25 significant bee die-offs between that one and 2003. The causes are unknown, but die-offs are not unprecedented.

Of course studies have purported to demonstrate the toxicity of neonics. But many were conducted in laboratories, using doses and application methods that bear no relation to what farmers do or what bees experience in the real world, where they might encounter neonic levels in pollen and nectar measured in parts per billion or trillion: the equivalent of a few seconds in 32 or 32,000 years, respectively.

Multiple field studies – in actual farmers' fields – have consistently shown no adverse effects on honeybees at the colony level from realistic exposures to neonics. In fact, bees thrive in and around neonic-treated corn and canola crops in the United States, Canada, Europe, Australia and elsewhere.

So it was highly surprising that a 2017 article in the respected journal Science claimed that two years of field studies in three countries showed exposure to neonicotinoid pesticides reduced the ability of honeybees and wild bees to survive winters and establish new populations and hives the following year. The article generated a fury of I-told-you-so declarations from the likes of Greenpeace and Pesticide Action Network. But it's no longer available online.

Perhaps that's because, as I explained in my own detailed assessment, the authors violated multiple guidelines for scientific integrity. Not only did their own data contradict their primary claim; they kept extensive data out of their analysis and incorporated only what supported their conclusions. That's fraud.

When all the missing and doctored data were examined, of the 258 separate honeybee statistical data analyses involved in the study, 238 found no effects on bees from neonics and 7 found beneficialeffects from the pesticide! Only 9 (a mere 3%) found harmful impacts, while 4 had insufficient data.

It's vital that we protect our honeybees, bumblebees and wild bees. But that means understanding history, science, modern agriculture and bee life expectancy – so that we are not so easily snookered by lurid tales of bee Armageddon, and we don't do more harm than good, for the best of intentions.

Paul Driessen is senior policy analyst for the Committee For A Constructive Tomorrow (www.CFACT.org) and author of books and articles on energy, climate and environmental issues.

SCIENCE & ENVIRONMENTAL POLICY PROJECT

The Week That Was April 10, 2021

Quote of the Week:

"Arrogance comes in a variety of forms. The arrogance of great wealth, the arrogance of great power, the arrogance of great beauty, and the arrogance of a great master are bearable because they rest on an acknowledged and measurable base. The arrogance of ignorance, however, is unbearable because it is rooted in smug satisfaction with being isolated from the facts of the case."
–Biologist W.V. Mayer [H/t Jim Buell]

****

Number of the Week:

One chance in one hundred thousand.

****

THIS WEEK:

By Ken Haapala, President Science & Environmental Policy Project (SEPP)

The Science & Environmental Policy Project began in late 1990 as a research effort by atmospheric physicist S. Fred Singer and a handful of graduate students working out of a small office in downtownWashington, D.C.The Project had two goals: (1) to gather material for a book on global environmental issues,and (2) to conduct a survey of scientists affiliated with the UN Intergovernmental Panel on Climate Change to determine the extent of what was, even then, being touted as scientific "consensus" on global warming.

What the graduate students discovered with their survey convinced Dr. Singer to set his book aside and instead to circulate among senior members of the American Meteorological Society a "Statement by Atmospheric Scientists" on greenhouse warming, which was quickly endorsed by 46 leading climatologists and atmospheric physicists (and eventually by nearly 100). That statement, issued on February 27, 1992, drew widespread media attention and was cited more than 150 times in the press. It was the first inkling journalists had that there was no scientific consensus on the reality of a global warming. Indeed, there was raging debate.

The Science & Environmental Policy Project was incorporated in the state of Virginia in 1992, and established as a nonprofit, 501(c)3 educational organization in late 1993.Today, having expanded from that core of 46 scientists, it draws on an international network of some of the finest minds in science who donate their time to promoting sound, credible, peer-reviewed research as the only basis for the health and environmental policies that affect us all.

You can help in two ways:

1. Download SEPP reports, press releases, and articles and pass them on – to newspaper editors, journalists, educators, civic leaders, and others. Help stop the fearmongering and the distortion of science.This is the most important thing you can do.

2. Support SEPP with your tax-deductible contributions. The environmental pressure groups, which present so much wrong information, have a combined clout of more than $1 billion a year.The Science & Environmental Policy Project has had far-reaching impact on less than one-hundredth of one percent of that figure. It's money well and effectively spent.

Send your contributions to:

And thank you.

Russian Roulette Anyone? Last week TWTW discussed Richard Feynman's book, What Do You Care What Other People Think? Further Adventures of a Curious Character which described Feynman's experience on the Rogers Commission investigating the explosion of the Space Shuttle Challenger. The book provides a description of the turmoil and difficulty in getting administrators in Washington to realize the importance of making necessary corrections in policies as evidence is compiled that the policy is headed in the wrong direction and may become disastrous. Engineers were crossing their fingers every time the Space Shuttle was launched. Meanwhile NASA administrators were assuring politicians that the Space Shuttle was safe. Feynman described the situation as administrators playing Russian Roulette with the lives of astronauts and civilians on the shuttle.

A similar situation exists today. Ken Haapala knows that senior administrators of NASA have been informed that carbon dioxide is not causing dangerous warming, a so-called "climate crisis." Yet they took no steps to correct members of NASA from claiming such. The director of NASA-GISS, Gavin Schmidt, is a member of President Biden's special Climate Team promoting fear of CO2-caused warming. The contrived fear has been promoted for about 25 years by the UN Intergovernmental Panel on Climate Change (IPCC) and various other government entities such as the US Global Change Research Program (USGCRP) and modeling entities such as the US National Center on Atmospheric Research (NCAR).

As demonstrated in the work of William Happer, Richard Lindzen, Howard Hayden, and others, decades of experiments and observations show that CO2 is only a bit player in changing climate. As importantly, the experiments and observations show that the effectiveness of CO2 on increasing global temperatures is logarithmic, which means that by its nature it is self-limiting. That is it takes an increasingly larger concentration to cause a given effect as the concentration increases. Even before the industrial revolution, or about 1850, whichis the starting point for many studies claiming human-caused global warming, the effectiveness of additional CO2 on increasing temperatures was small. The generally accepted value for CO2 concentrations in 1850 is about 280 parts per million by volume (ppmv). As atmospheric CO2 increases, its effectiveness in increasing temperatures by delaying radiative cooling diminishes significantly. The concentration of CO2 in the atmosphere is now about 410 ppmv.

The fear of CO2 causing dangerous warming and the political movement supporting it is creating ever increasing absurd proposals for "controlling" climate change. The enormously wealthy Bill Gates has advanced a proposal for diminishing sunlight, and the US National Academies of Sciences, Engineering, and Medicine issued a book: Reflecting Sunlight: Recommendations for Solar Geoengineering Research and Research Governance. Apparently, it has never dawned on either Gates or the National Academies to search for the physical evidence demonstrating that CO2 is causing dangerous global warming. If they did, they would find the physical evidence weaker than the evidence used to claim the world is about to run out of oil and natural gas. Further, whatever evidence they may find is bound to be very weak, and strongly contradicted by compelling physical evidence.

Just as senior NASA administrators played Russian Roulette with the lives of those on the Space Shuttle, the Biden Climate Team and many in Washington are willing to play Russian Roulette with the lives of millions of people world-wide. They are unwilling to ask the needed question: What is your physical evidence?

What Happened? The 1979 Charney Report speculated that a doubling of CO2 would cause global temperatures to increase by 3 °C +/- 1.5 °C (about 3 to 8 °F). There have been thousands of papers based on the high estimates, including many exaggerations. However, actual measurements of the atmospheric temperature trends show that even the low end of the estimated range may be too high. The Charney Report relied on claims by some numerical climate modelers that a small warming from CO2 would result in a far greater warming from increasing water vapor. This far greater warming is not being observed in the atmosphere where it should take place. The question is why are we not seeing it?

Ten years ago, Meteorologist Chuck Wiese posted on WUWT a criticism of claims by Al Gore:

"Gore claimed:

"'These warmer air masses (which Gore claims result from human carbon emissions that create atmospheric CO2) act like a sponge to moisture and soak it up until they hit a patch of cold air.'

"Gore then claims that this 'extra moisture' contained in the warmer air causes more intense precipitation and thus heavier snowfall and is all consistent with a warming earth.

"These statements by Gore are sheer nonsense. While it is true that warmer air can hold more moisture than cold air, the temperature of the air has nothing to do with how much water vapor will ultimately be evaporated (or as Gore puts it 'soaked up') into it. That is determined solely by what is called the vapor pressure gradient that exists between a sample of air that may overlay a plane of water. To examine this, we need to introduce the physical concept of vapor pressure.

"The equation that governs this is called the Clausius-Clapeyron equation for the vapor pressure of water and was named after the two chemists that derived it."

Without TWTW going into the mathematics, Wiese explains that it is the difference in vapor pressure between the air mass immediately over the water and the large air mass passing over it that results in the absorption of water, not the temperature difference. If there is no big difference in vapor pressure, there is no significant increase in absorption of water, regardless of temperature differences. Wiese gives good illustrations of this phenomenon, and how big differences in vapor pressure result in what is commonly called "lake effect snow" that takes place each winter in areas bordering the Great Lakes, such as around Buffalo, New York.

The comments by Wiese led to a search of papers on the boundary conditions along the tropics where the Charney Report and climate modelers speculated significant absorption of water vapor would lead to the tropical "Hot Spot," which has not been found even though it dominated the second IPCC assessment report (AR2, 1995). Wiese further commented on 1990s research called the Central Equatorial Pacific Experiment (CEPEX). The abstract of one study on "Atmospheric boundary layer over the central and western equatorial Pacific Ocean observed during COARE and CEPEX" published in the Journal of Geophysical Research Atmospheres states:

"The present study is based on aircraft data collected in the western and central equatorial Pacific as a part of the Coupled Ocean-Atmosphere Response Experiment (COARE) and the Central Equatorial Pacific Experiment (CEPEX). The purpose of this discussion is to provide some insight into the coupling of the atmosphere to the ocean in regions of light winds and high humidity, as well as near deep organized convection, and to compare and contrast these climatically important tropical regions. The results presented use both the aerial extent of cold cloud top temperatures and surface layer similarity to highlight the variation of the surface fluxes as a function of convective regimes. A wide range of convective conditions were encountered during the 5 months of COARE and CEPEX, ranging from deep, towering anvils to shallow trade cumuli. The variety of conditions sampled has provided a unique set of turbulence data over open ocean, which are compared to fundamental spectral forms. Results suggest that assumptions regarding surface layer processes based on a large-scale assessment of the convective conditions are likely to be inaccurate."

One of the purposes of the CEPEX experiment was to investigate what is called the thermostat hypothesis including a super-greenhouse effect. One can reasonably assume that if strong evidence for the super-greenhouse effect were found, it would have been widely announced. There appears to be no continuation of the experiment, perhaps due to satellite measurements.

Last week, TWTW discussed that since 1975 NOAA has been using satellites to measure Outgoing Longwave Radiation from the Equator, 160E to 160W. These 55 years of data show wide variations but no trend. Without changes in Outgoing Longwave Radiation from the Equator there is no evidence of a super-greenhouse effect over the tropics in the Pacific.

14th ICCC Rescheduled: The 14th International Conference on Climate Change presented by The Heartland Institute has been rescheduled to October 15 to 17, 2021, at Caesars Palace in Las Vegas.

Number of the Week: – One chance in one hundred thousand. In his book, Richard Feynman has a chapter titled "Fantastic Figures" in which he describes some of the estimates by NASA administrators that the Space Shuttle was safe to fly. NASA told the officer who decided whether to put destruction charges on the shuttle that the probability of failure was one in ten to the fifth power – 1 in 100,000. Feynman commented:

"That means you could fly the shuttle every day for an average 300 years between accidents—every day, one flight, for 300 years—which is obviously crazy!"

The response from the officer was:

"'Yes, I know, I moved my numbers to 1 in 1000 to answer all of NASA's claims—that they were much more careful with manned flights, that the typical rocket isn't a valid comparison, et cetera—and put the destruction charges on anyway.'"

Based on reviews of the climate modeling by NASA-GISS, 1 in 100,000 is the chance that NASA-GISS climate models are even remotely correct.

Navy SEALS Arrest Hillary Clinton

cont. from page 1

him a "mammoth trove" of evidence of Clinton's criminality dating back to her days at the State Department. The evidence allegedly includes thousands of never-before-seen emails, which Clinton acid washed prior to the 2016 presidential election, as well as documents implicating her in plots to assassinate Republican legislators across the country.

The evidence was so compelling, our source added, that Adm. Howard had trouble believing that Clinton wasn't arrested years ago.

"Trump's been wanting to get her, and the rest of the Deep State cabal, ever since he set foot in the White House. It has taken him years to dig up the motherload. Once he had military support, he greenlit the operation. Trump's team, for lack of a better word, had been surveilling Clinton a long time, and he knew she was always alone on Tuesday nights. That's when the SEALS nabbed her," our source said.

Under cover of darkness, an eight-man detachment from Naval Special Warfare Group 3 infiltrated the Chappaqua mansion shortly after 2:00am. Mysteriously, Clinton's two-man Secret Service detail, which normally lives in a guest house on the property, was absent that morning. The SEALS cleared the main building, then silently breached the door to her bedroom, where they found her awake rehearsing a speech before a vanity mirror. They fired a single tranquilizer dart into her neck, our source said, before taping her mouth and sealing a black cloth bag over her head.

The SEALS also seized several laptops and reams of paper, our source said.

"I don't know where they took her; only Trump knows that. But this is proof that Trump and the military have started taking out the cabal. It took him longer than expected, longer than he wanted, but better late than never. Trump is doing what's right for America," our source said.

Trump will soon send her to Guantanamo Bay to face a military tribunal for her crimes against America and its people. GITMO, our source said in closing, is run by the Marine Corps. and the US Navy, both of which have forsaken Joe Biden and instead pledged to help Donald Trump vanquish the forces of darkness that have enshrouded the nation in corruption for decades.

Clinton Military Tribunal: Day 1

By Michael Baxter, Real Raw News, April 8, 2021.

A military tribunal on Thursday morning convened at Guantanamo Bay to decide whether Hillary Rodham Clinton will be exonerated of charges including treason, conspiring with the enemy, destruction of government property, money laundering and conspiracy to commit murder, or if she will ultimately stand before a gallows or a firing squad.

Three U.S. military officers—two males and one female, serving as both judge and jury—listened for two hours as Vice Adm. John G. Hannink of the U.S. Navy's Judge Advocate General's Corps listed eighteen specific charges against Clinton and said he would supply compelling and incontrovertible evidence linking her to countless atrocities against the nation and its population.

The most egregious charges implicated Clinton in murder-for-hire plots against politicians and media entities who were critical of her methods and motives while serving as Secretary of State under Barack Hussein Obama.

Vice Adm. Hannink began the inquisition by linking Clinton to the 2016 murder of Seth Rich, a former employee of the Democratic National Committee around whom many conspiracy theories surfaced after an unknown assailant shot him twice in the back in the Bloomingdale neighborhood of Washington, D.C. Hannink's evidence seemed to prove many of those conspiracy theories were firmly grounded in reality.

He showed the tribunal a decrypted email sent by Clinton to her advisor and political strategist, Huma Abedin. The email had a brief and ominous allusion to Clinton's goals: "Arranging a dinner for R.S., will know soon."

Vice Adm. Hannink asserted the innocuous sounding message was an admission of guilt; R.S.—Rich's initials reversed, and "arranging a dinner" meant Clinton had hired an assassin to take Rich out. The email was dated July 8, 2016, two days prior to Rich's murder.

Moreover, Vice Adm. Hannink produced financial records showing that Clinton had withdrawn $150,000 from a Clinton Foundation bank account only days before Rich's tragic demise.

"She's as arrogant as she is sloppy. When you connect the dots, there is no other explanation—Clinton contracted a paid assassin to end this man. And for what? Because he might have been a whistleblower?" Vice Adm. Hannink argued.

Additionally, Clinton was charged with accessory to murder in the untimely demise of conservative Supreme Court Justice Antonin Scalia, who on February 13, 2016 inexplicably suffocated in his bedroom at Cibolo Creek Ranch in Shafter, Texas. The county's judge, Cinderela Guevara, pronounced Scalia dead of natural causes, but no autopsy was performed.

In an unexpected move, Vice Adm. Hannink produced a surprise witness, former Clinton staffer Jake Sullivan, her senior policy advisor during her 2016 bid for the presidency. In exchange for immunity from prosecution, Sullivan recounted a meeting he had attended with Clinton and former campaign manager Roby Mook. Judge Antonin Scalia was the topic of conversation. Per Sullivan's testimony, Mook told Clinton that Scalia's "catalyzing conservative values" were a great threat to progressive liberalism.

"Roby Mook told Hilary it wouldn't be a bad thing if Justice Scalia 'went away,' to which Hillary said she certainly wouldn't mind if he did go away. She then asked Roby 'can he go away?' And Roby told her 'yes, I think he can go away'," Sullivan told the tribunal.

Vice Adm. Hannink contended the evidence, though circumstantial, was damning enough to incriminate Clinton, given her wanton disregard for human life.

At that point in the tribunal, Clinton, who had remained oddly silent through the proceedings, began trembling uncontrollably as if gripped by seizure. Shackled at the wrists, she fell from her chair and flopped around on the floor like a fish out of water.

Paramedics escorted her to GITMO's medical ward, and Vice Adm. Hannink declared the tribunal in recess until 10:00 a.m. Monday.

For Tribunal: Day 2 see page 24

Morano v. Gates: Amazon pressured to cancel 'Green Fraud' as book sales dethrone Bill Gates' 'Climate Disaster' book

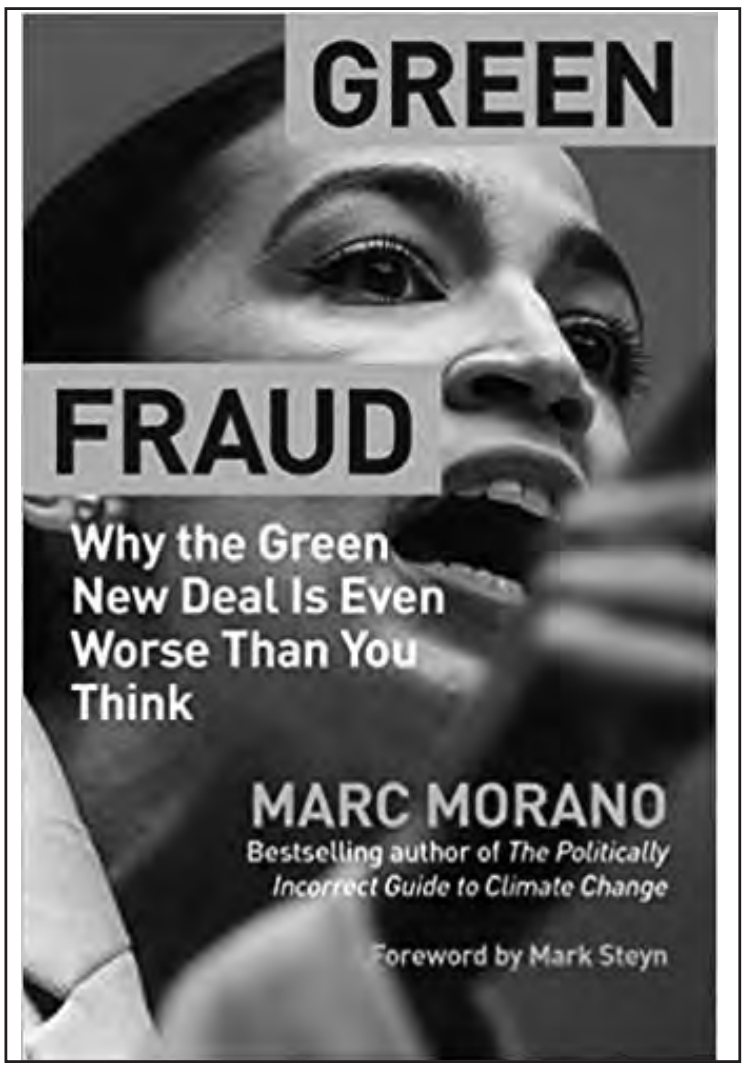
– DailyKos: "Longtime fossil fool Marc Morano has a "new" book out about how "the Green New Deal is even worse than you think." ($24.99 on Amazon) …If you're wondering who on Earth would publish a career liar's book of regurgitated old blog posts, may we introduce reliable conservative propaganda producer Regnery publishing." …

"Given that Amazon claims to want to be a climate savior, how does it justify selling books like this, and so, so many others, that very intentionally work against a goal of climate action? You can either be a climate champion, or you can sell and profit off of climate denial books like Morano's, that 'recycle scientifically unfounded claims that are then amplified by the conservative movement, media, and political elites.'"

Mark Steyn on Amazon being pressured to cancel Morano's 'Green Fraud' book: 'The warm-mongers are opting for their preferred method of disposal – get 'em canceled'

– Mark Steyn: "If you've seen Marc Morano interviewed by yours truly when I'm hosting on Fox, you'll know that the former is absolutely the sharpest critic of Big Climate and their plans for the rest of us. (You can see our most recent conversation here.) So I was honored to be asked to write the introduction to Marc's new book, Green Fraud: Why the Green New Deal Is Even Worse Than You Think." …

"Amazon, the world's biggest bookstore (and, since Covid, increasingly the only bookstore) has applied that logic in recent weeks to authors who question trans orthodoxy. Will they extend it to those who dissent from climate orthodoxy? Well, we'll see. But, with that threat in mind, we're pleased to do our bit to ensure that Green Fraud will remain available at least in one online emporium – the SteynOnline bookstore. And, while we can't match some of those Amazon discounts, when you purchase from us, I'll be happy to autograph my introduction to Green Fraud to you or your loved one.



Making It Easy To Vote and Hard To Cheat Isn't Racist

By Gary L. Wickert

One day the left will run out of silly things to claim are racist. But then again, maybe not. Last week Major League Baseball joined the ranks of the NBA and the NFL as sports I and millions of others will never again watch. Commissioner Robert Manfred embarrassed himself and the game itself by bowing to the cancel culture movement and pulling the All-Star Game out of Atlanta due to the Georgia election reform laws that simply brought Georgia in line with how many other states handle their elections. The move is the latest in a long and tiresome line of corporate and organizational virtue signaling. As Commissioner Manfred pats himself on the back for caving to those who do not even understand the recent Georgia legislation, Major League Baseball continues to cozy up to the despicable communist regimes in China and Cuba. The hypocrisy is deafening, as evidence by Commissioner Manfred's long-time membership at the Augusta National Golf Club.

What the woke cancel culture does not seem to recognize is that facts do not cease to exist simply because they are ignored. Social media have been flooded with inaccurate lies and distortions from Leftists and anti-America crusaders who have been told that the new Georgia law—known as the "Election Integrity Act of 2021" is "restrictive" and "racist" and that if you are against voter suppression you must be against this new "Jim Crow" law as it was referred to by a President Biden who did not even bother to understand what the law actually did. In fact, what it did was actually expand voter access for most Georgians, including African-Americans. What it did was enact restrictions on handing out food, drink, and other goodies to potential voters near polling places—making it identical to the restrictions that are currently in place in New York and Biden's home state of Connecticut.

"Among the outrageous parts of this new state law, it ends voting hours early so working people can't cast their vote after their shift is over," our uninformed president maintained. But that is absolutely false. Contrary to our president's lies, the new Georgia legislation does not mandate that polls close by 5 p.m. Voting in Georgia continues to last from 7 a.m. to 7 p.m. and anybody in line to vote by 7 p.m. is allowed to vote no matter how long it takes. The new law did not change that. In fact, the new law actually expands weekend voting before election day.

Biden and most of social media unleashed a torrent of criticism at how the new law "adds rigid restrictions" on casting absentee ballots. All it does is require voter identification for individuals casting absentee ballots and brings Georgia in line with voter ID requirement laws passed in Alabama, Kansas, Mississippi, New Hampshire, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Virginia, and Wisconsin since 2012. In light of the widespread fraud which cheapened the entire election process during the 2020 presidential election, Georgia's new law also requires voters to request absentee ballots 11 days before the election. In its previous form, the law allowed voters to request ballots by the Friday before Election Day. The deadline has not changed—it is still before Election Day. But the Georgia law provides that voters can return applications for absentee ballots online, through the Secretary of State's Office. Over 96% of Georgia voters already have identification, but the new law also says that alternative identification would be provided at no charge to those who need it. Even the civil rights leader Andrew Young famously said, "I am against voter fraud in any form and I have long supported a national voter ID card."

Major League Baseball must believe that the new Georgia law "makes it a crime to provide water" to voters standing in line, because that is what our president said. But it would be wrong. The new legislation clearly and specifically permits official poll workers, as opposed to campaign workers, to provide water to voters. The law works to keep voting integrity by cutting down on the practice of using "line warming" as a convenient loophole to conduct political activity in violation of state law.

Contrary to what Stacey Abrams has been claiming, the new law—also known as Senate Bill 2002—does not "render drop boxes useless." That is just mindless ignorance, plain and simple. Even a New York Times article on March 30 described the legislation as a "GOP-backed bill that prohibits the use of drop boxes." But it does not. At all. I wonder if Commissioner Manfred knows that the new Georgia law actually codifies the use of drop boxes. Each county now has to provide at least one drop box—a practice which was widespread during the fraud-plagued 2020 election due to Covid.

The inflammatory and inaccurate rhetoric continued as liberal organizations and Elizabeth Warren belittled real racism by referring to the new law as "Jim Crow 2.0." The term Jim Crow referred to Democrat-sponsored racist laws in the South following the Civil War which restricted employment and educational opportunities for African-Americans. To refer to the new legislation in this fashion is insulting and an outright lie.

Stacey Abrams, the most famous state legislator in history simply because she lost an election to higher office, has said that the new law would "allow legislative takeovers of local boards of elections, and much more." While the new law does give the Georgia legislature a broader role to play in the State Election Board, the Secretary of State will no longer chair the Board. It prohibits the chair from having been a candidate or having participated in a political party organization or campaign for two years prior. Clearly this does not amount to "voter suppression."

Major League Baseball and its commissioner failed to do their homework. Most of America—on both sides of the political aisle—have seemingly resorted to getting their news and information from biased sources and then flatly believing what they hear. The reactionary and ignorant pulling of the All-Star Game not only begs the question of what baseball has to do with politics but is clearly the product of believing wildly unsubstantiated and feckless lies and exaggerations about a common-sense effort to curb voter fraud, which is the real enemy.

Now there is one more sport I cannot and will not watch. And it is a sad day when a silly sport—which has absolutely nothing to do with politics—bends to bullies and endorses lies about a law which simply brings Georgia in line with the laws in many other states, including President Biden's own home state of Connecticut. A law which actually expands voting opportunities is condemned by those who are either unwilling or unable to look at the facts before they parrot the lies. Major League Baseball has joined the ranks of liberals who are either historically ignorant or deliberately dishonest.

How Identity Politics Prolongs Racism: New MLI Commentary by Chris Sankey

OTTAWA, ON (March 19, 2021): Identity politics has long been an animating force in Western society and politics. Yet with respect to addressing ignorance, confronting racism, and pursuing reconciliation, is identity politics the right framework?

According to MLI Senior Fellow and former elected Lax Kw'alaams Band Councillor Chris Sankey, the answer is an emphatic no. In MLI's latest commentary titled "How identity politics prolongs racism," Sankey looks at the need to address gaps between Indigenous people and non-Indigenous Canadians. Yet, as he argues, an identity politics framework offers little value in that regard – it is just another form of the paternalism that "has kept generations of Indigenous people down."

"I can appreciate that many people who claim to engage in identity politics on behalf of people like me earnestly believe that they are making the world bet?ter," writes Sankey. "They are wrong."

In his view, identity politics reduces the value of individual people, experiences, and communities by lumping groups into blanket categories. Sankey argues that it imposes identities onto people, often by people who are themselves outsiders to the communities that are being labelled.

"We do not need governments or out?side groups to tell us who we are or speak on our behalf. I am tired of being labelled as nothing more than an Indigenous person, a Native, or a First Na?tions. I am these things, but they do not define me or my experience."

"If you want to use a label for me, I am Tsimshian."

While ignorance and racism are serious problems that ought to be addressed and confronted, identity politics is not an effective solution. Sankey notes that such an approach can hardly be counted on to change people's minds, and rather than facilitating progress, it often devolves into combativeness.

Particularly as it pertains to Indigenous people, a much better solution is needed if meaningful reconciliation is to occur. For Sankey, this comes from empowering communities, allowing them to make their own economic decisions (especially with respect to participation in the resource economy), respecting rights, and highlighting the rich and diverse cultures and identities of First Peoples in Canada.

"We do not need identity politics to advance reconciliation. It is an impediment to the process. What we need is the ability to act upon our rights so that we may determine our own political and economic futures, free from dependence and paternalism."

While identity politics seeks to further define issues along lines of race and identity, Sankey finds that it in fact reinforces racist and paternalistic attitudes. He cites environmental activities as among the most significant perpetrators of using identity politics to paint all Indigenous peoples with one brush, perpetuating a system of race-based politics wherein First Nations are unable to determine their own futures.

By contrast, he argues that true reconciliation requires communities to be able to access the opportunities that have been closed off to Indigenous communities for far too long.

"Please stop trying to save Indigenous people. That has never worked for us. We want – and deserve – equal opportunities," concludes Sankey. "And we desperately need non-Indigenous people to stop describing us in ways that meet their needs and not ours."

Woke Corporate Politics

cont. from page 1

comes to you.

Why not do something REALLY BIG?

Like maybe shut down one of Woketopia's largest revenue sports events during a post-pandemic economic recovery — and in the process alienate half of your customers — in order to demonstrate that your visionary vainglorious election rules are best for the entire country.

Central to these priorities is to do away with racist restrictions that all legal voters be required to identify themselves.

As in a Zoom conference from hell, several similarly inclined CEOs joined the cancel chorus conspiracy choir.

According to Atlanta-headquartered Delta Airline CEO Ed Bastian, the new voting law "is unacceptable and does not match Delta's values."

Not explained is why Delta then expects and requires Blacks, along with all other racial and ethnic passengers on their aircraft, to supply proof of identity on all flights — including passports for international access eligibility.

Atlanta's Coca-Cola-based CEO James Quincey was also quick to join the virtue-signaling parade, telling CNBC host Sara Eisen that the Georgia law was "unacceptable."

Quincy said, "We are disappointed in the outcome of the Georgia voting legislation."

Having previously endorsed the Democrat-proposed HR-1/SR-1 bill that would centralize all control over voting procedures in Washington, Quincy added that "Our focus is now on supporting federal legislation that protects voting access and addresses voter suppression across the country."

Not to be left out, American Express CEO Steve Squeri said that his company "stands against any efforts to suppress voting."

"BlackRock is concerned about efforts that could limit the ballot," said CEO Larry Fink. Cisco's CEO, Chuck Robbins, chimed in, saying that "Governments should be working to make it easier to vote, not harder."

Joe Biden, the nation's CEO, piled on. Referring to the Georgia legislation as "sick," he claimed: "Instead of celebrating the rights of all Georgians to vote or winning campaigns on the merits of their ideas, Republicans in the state instead rushed through an un-American law to deny people the right to vote."

None of them apparently — including President Biden — ever bothered to have their legal departments check actual facts.

For example, although Georgia's new law tries to reassure all citizens about ballot integrity, it also expands opportunities to vote beyond what existed even two years ago, and is far more permissive than prevailing laws in many blue states.

Unlike Biden's beloved Delaware, Georgia offers no-excuse absentee ballots.

New Yorkers eligible for absentee ballots must be ill or disabled; a primary caregiver; or someone in jail awaiting grand-jury action or sentencing.

In addition, Georgia provides for more days of early voting than in New York.

And although the Georgia law places limits on mail-in drop boxes, it also makes them a permanent part of the voting system. Before COVID, drop boxes were illegal there.

That contrived controversy resulted in Commissioner Robert Manfred's call to move Major League Baseball's All-Star Game from Atlanta to Denver which is located in a state with tighter voting restrictions than Georgia's.

Nevertheless, referring to the Georgia legislation as "Jim Crow on steroids," Joe Biden said he'd "strongly support" the move. Even the reliably liberal Washington Post saw fit to award Biden four Pinocchio's for his remarks.

So perhaps, like me, you are scratching your head in bewilderment why some CEOs publicly inserted themselves into attacks on legislative changes to Georgia's voting ballot access and integrity laws which they obviously hadn't read.

Why would such captains of capitalism be so eager to unnecessarily anger the conservative half of their politically divided customer base?

I seriously doubt that such self-righteous assaults on nonexistent Georgia voter suppression truly have much of anything to do with addressing civil rights issues. If such were the case, how does it square with hysterically hypocritical business deals that Big Baseball and Big Business are inking with Chinese oligarchs who aren't generally known for prioritizing such freedoms for their own citizens … minority Uighur populations most particularly?

In what ways do interventions of prominent American business executives and corporate PR departments into cancel culture adventurism benefit economic interests and responsibilities to their stockholders and stakeholders?

And wouldn't their employees — some of whom likely include many conservatives — then be expected to realize that resulting market losses will lead to lower profits and slower worker wage increases, along with higher consumer prices to make up for higher costs?

How does taking a knee to the groins of millions of conservatives in suppressing legitimate state voter integrity protections through radically rigged Democrat-Socialist legislative agendas comport with any plausible pretense of advancing election fairness?

If successfully ramrodded through the Senate, SR-1 will virtually ensure that Republicans never again fairly win a national presidential or congressional election.

On the other hand, what will happen to those power-pandering allegiances if/when — gasp — Republicans overturn razor-thin Democratic congressional control in 2022, and the Oval Office in 2024?

Why would any CEO choose to bet her or his career — along with billions in company profits — on an assumption that aligning their "brand" with partisan Democratic politics will serve any long-term competitive advantages?

Do they realistically expect that doing so will provide any lasting extortion insurance against woke-washed mobs who will always turn on them demanding additional concessions?

Such corporations are in store for very rude woke re-awakenings if they expect loyalties from resentful former customers their toxic partisanship has turned away from buying their products and viewing MLBTV.

And many of us won't miss them a bit.

Teachers' Unions

cont. from page 1

family services provided by the county.

Neither Fairfax County teachers nor students have been in the classroom since March 2020. A small number of students are now returning but will be supervised by non-teaching monitors, that certainly must be immune from Covid-19, if the teachers are willing to put them at risk in a classroom? Teachers have been prioritized for being vaccinated but want more before returning to teaching, including all students being vaccinated, young children being vaccinated but there is no vaccine for them, new ventilation and made-up, new demands the night before any day school is to start. This is not good-faith negotiating.

I could stop my tail of teacher woes and conclude as I started, by telling parents, nothing can be done. For any American to come to that conclusion is Un-American. We can always do something.

Parents in Fairfax County are starting recall efforts. A new collective bargaining law in Virginia requires only 30% of union members to approve of the Fairfax County Federation of Teachers to be the exclusive bargaining agent for the teachers and to control the negotiating process. Parents need to make themselves involved, even if it means Gandhi's style passive resistance or non-cooperation. Any school board member supporting a teacher-friendly agreement that ignores students should be on the recall list.

We have options, we need to use them.

The bigger issue, however, is that we need our children to get the best education possible so they can compete in the world. Teachers refusing to teach in a classroom is the best example of why the current public school system, created in the 19th century, has failed and must be totally dismantled.

Throughout the past year, over 4.5 million students were in private (20%) and religious (80%) schools across the nation, and teachers have been teaching in classrooms without any serious illnesses. Those schools need to be the models. So how do we get more children into working schools?

Private schools are within the economic reach of all students.

The belief is that most parents cannot afford private school since the annual costs range from $6,000 to $30,000. But ranges are ranges and the real question - is the U.S. getting value for the $720 billion dollars it spends annually on education? And this number is low since another $200 billion will be spent on education due to the pandemic. For sake of discussion are U.S. taxpayers getting $1 trillion worth of value from teachers not teaching?

According to educationaldata.org, the U.S., the cost per student for public education is less than private education. Currently, the average cost per student is $14,840 at public schools. Currently, the average cost per private school is $12,350. The range for private schools is $4,840 at the nation's catholic elementary schools and can be as high as $37,500 at the 260 most exclusive boarding schools. On average what is spent, per pupil, on public schools, would pay for private school education, that would provide teachers for our students.

Action: Recognize teachers and their unions have made education a political issue. Education is no longer about children; it is about teachers' rights and union power in the Democrat Party. Teachers have paid handsomely for this protection which insulates them from parents and government officials. Teachers are the leading financial contributors to the Democratic party since 1990. "Teachers union members comprise 10 percent of the delegates the Democrat National Convention, where they represent the single largest organizational bloc of Democratic Party activists."

Once recognized as a political issue it must be understood it is a battle for the educational soul of children. Parents want their children to receive the best education possible so they can succeed in an internationally competitive world. Teachers want paychecks and protection from accountability. While there are more parents than teachers, unions have the money which is what talks to politicians. Forget about small changes like a few more charter schools, a little more school choice, or a few extra scholarships to private schools. Those incremental steps merely let teachers' unions win by giving parents a pyrrhic victory. The entire system must go!

Solution: Let all the taxpayers' educational money paid to the public schools follow the student. Let the parents and the student select the best school for the child. In a non-pandemic year, there are $ 721 billion dollars to divide between students by state. Students in New York would receive $28,228 a year for the school of their choice. Students in the District of Columbia would receive $31,280 a year. The smaller, more rural states spend far less on education but costs are less, i.e., Utah and Idaho are in the $8,000 to $9,000 range. Most states would be in the $10,000 to $15,000 range. Literally, all public school expenditures are above the averages for private schools.

Schools will compete for the best teachers so they can be the best schools. Schools will also compete for students so they can support the school. When the money follows the student, the parents and students will use the taxpayers' money to get the best education possible for their child. This competition also helps the nation by producing new generations of leaders and likely better teachers.

A free, competitive market will provide the best education for our children. It allows all schools, public or private, to compete for the taxpayers' money spent on educating students, not supporting unions and all their silly work rules, outrageous demands, and total disregard of the people who pay teacher salaries.

Dane County Drops Most Fines Against Dance Studio

Health department enlisted the wrong attorneys and filed far too many counts

The News: Dane County attorneys, on behalf of Public Health Madison and Dane County, have significantly reduced the fines they are seeking from A Leap Above dance studio in Oregon, Wisconsin. WILL is representing A Leap Above after the health department fined the dance studio for what it misleadingly characterized as a "performance" of the Nutcracker on December 13, 2020. The initial complaint sought nearly $24,000 in fines.

WILL attorneys got the City of Madison to dismiss the initial enforcement action because the Dane County health department illegally enlisted City attorneys to enforce a county ordinance. WILL attorneys also noted that the initial filing's legal theory—one count per person allegedly at the studio—was inconsistent with both the order and ordinance. Dane County attorneys refiled the action on Friday, but dropped most of the counts.

The Quote: WILL Deputy Counsel, Luke Berg, said, "The health department's shifting theories illustrate what we've been arguing all along; that a single, unelected official cannot have the power to write, reinterpret, and enforce her own municipal code. These were just a few of the flaws with the enforcement action against A Leap Above. We are disappointed the county chose to refile it, but are confident A Leap Above will be vindicated by the courts."

Background: The Dane County Health Department issued an order in November with a ban on some in-person gatherings, but the order allowed "child care and youth settings" such as "unregulated youth programs" to continue to host groups of 15 or fewer students. The Wisconsin Department of Children and Families puts "[g]roup lessons to develop a talent or skill such as dance," like A Leap Above, into that category.

A Leap Above, in Oregon, Wisconsin, normally hosts a performance of the Nutcracker during the holidays. Due to COVID, A Leap Above owner Natalie Nemeckay realized that a performance would not be possible, so she came up with a safe, innovative way to allow her dancers to do the dances they had been practicing, to bring them some joy during the holidays, while complying with the order. They came to the studio in groups of 6-10, wearing masks, to record their dances. The groups rotated through separate rooms to change and do their dances in a consistent direction and were scheduled over a six-hour period to minimize interactions. There was no audience and even parents were required to wait in their cars.

Public Health Madison and Dane filed a complaint against A Leap Above for this, seeking nearly $24,000 in fines. The Health Department's complaint suggests that A Leap Above was warned prior to the event that it would violate the order in place at the time, but this is not true. The event occurred on a Sunday – the Health Department mailed a letter on the Friday before, but it did not arrive until Monday, after the event. The Department also left a voicemail on Friday, while the business was closed, and the studio did not receive it until Monday.

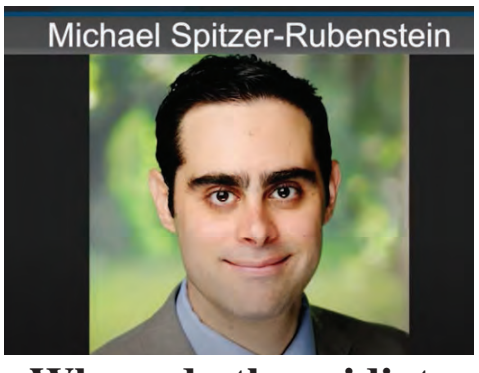
A Leap Above is represented by WILL in the fight against the health department's fines. In addition, A Leap Above joined a separate lawsuit, filed in January in Dane County Circuit Court, that challenges the authority of the Dane County health department to issue sweeping restrictions without oversight or permission from local elected officials.

Rep. Sanfelippo Praises Start of Elections Investigation

MADISON, Wis. – This afternoon, the Wisconsin State Assembly passed Assembly Resolution 15, directing the Assembly Committee on Campaigns and Elections to investigate the administration of recent elections in Wisconsin. Rep. Joe Sanfelippo (R–New Berlin) authored Assembly Resolution 15 and issued the following statement:

"There have been troubling reports of state and local elections officials disregarding the clear language of our state's voting laws and regulations during recent elections. In our recent hearings in the Assembly Committee on Campaigns and Elections, we heard testimony from witnesses and reviewed records of electronic communications between elections officials, which have together provided persuasive evidence of a number of clear violations of the law. I am pleased that my colleagues in the Assembly have joined me today in recognizing the significance of these concerning allegations and the need conduct a thorough and methodical investigation.

"As lawmakers engaging in our oversight duties, we need to carefully scrutinize the identified instances of apparent noncompliance with our elections laws and to determine just how widespread such noncompliance is around the state. I want to make it clear that the objective of this investigation is not reviewing or relitigating the results of any specific race or election; rather, the focus of the investigation is to examine the processes used, and actions undertaken, by elections officials as they conducted recent elections. We need a comprehensive understanding of how our laws are being followed so that we can hold accountable any individuals who have willfully disregarded them and to work to refine our laws as necessary to ensure that the actual practices comport with the law moving forward. The Resolution approved today lays the foundation for the Committee to use certain investigative powers granted to it by statutes and rules, including the ability to request the issuance of subpoenas to compel witnesses to appear before the committee or to produce relevant documents or records."



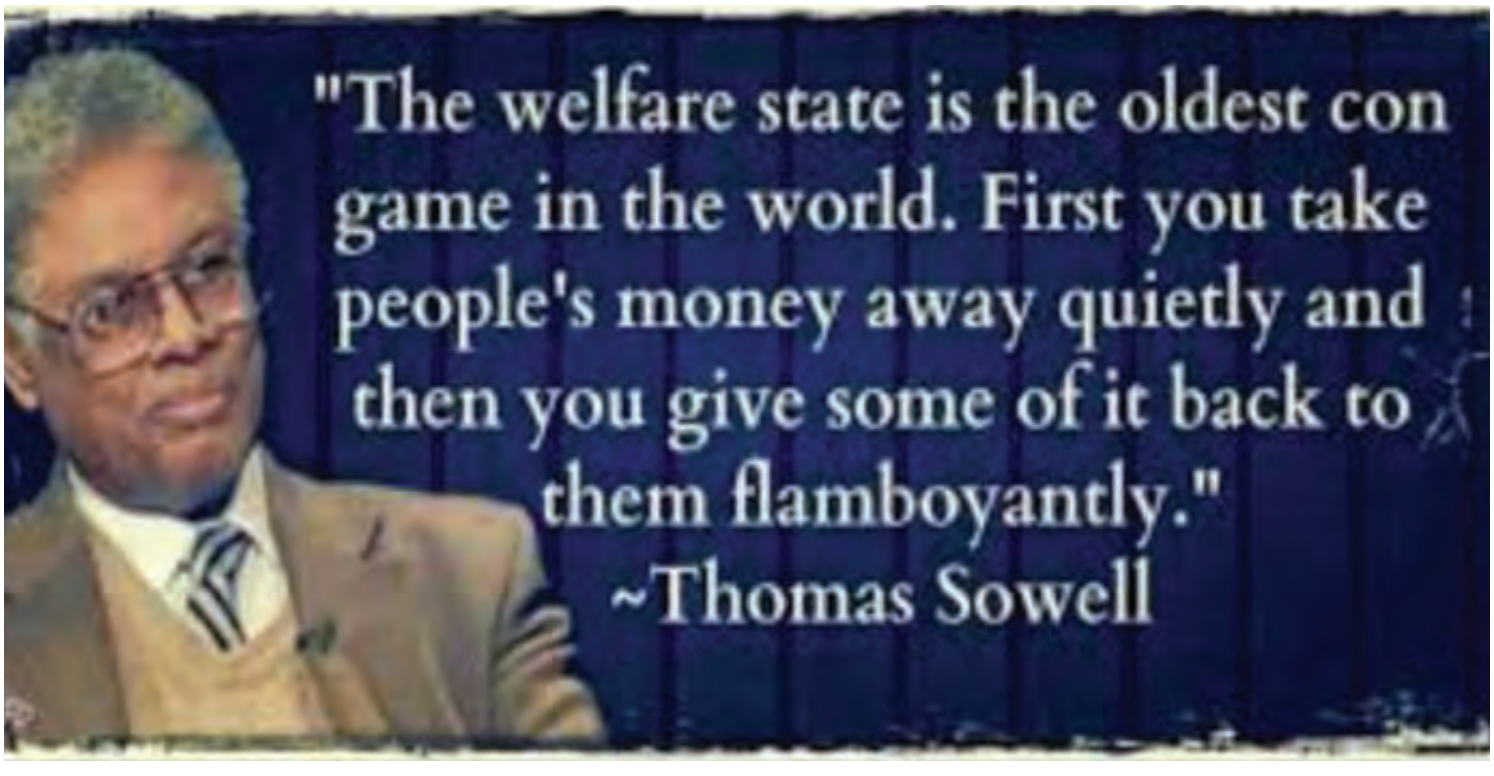
Where do these idiots come from?

By MacIverNews, April 3, 2021

Republican lawmakers seem to have the City of Green Bay cornered on its relationship with Dem political operative Michael Spitzer-Rubenstein. Whether Rubenstein was an employee, contractor, or observer is an unresolved question – but regardless of the answer, laws would have been broken.

The City of Green Bay received a $1.6 million grant to help run its election from the Center for Tech and Civic Life – a facebook funded activist organization. As part of the deal, Democrat political operative Michal Spitzer-Rubenstein was given full access to the city's election process – including central count on election night.

The Assembly Committee on Campaigns and Elections heard testimony from Meagan Wolfe on Wednesday, Mar. 31, 2021. Wolfe is the administrator for the Wisconsin Elections Commission (WEC). She said WEC has no authority to investigate, regulate, or even monitor outside groups relationships with local elections officials.



State Supreme Court Ends Evers' Never-Ending Emergency Orders

By MacIver Staff, March 31, 2021

"The question in this case is not whether the Governor acted wisely; it is whether he acted lawfully. We conclude he did not" – Justice Brian Hagedorn

"While a pandemic will not follow the laws of men, the Governor must" – Justice Rebecca Bradley

March 31, 2021- The Wisconsin Supreme Court ruled 4-3 that Governor Evers exceeded his authority by declaring multiple additional states of emergency after the first one expired.

The State Supreme Court confirmed what is written in state statute that the Governor can only declare one 60-day state of emergency for a single public health occurrence unless the legislature passes a joint resolution to extend it. Evers declared states of emergency in March, July, September, November, January, and February in response to COVID-19.

Governor Evers claimed that his multiple emergency orders were for different emergencies, but the court ruled they all applied to the same emergency, COVID-19.

As far as the law was concerned, the orders were essentially all the same.

"The question in this case is not whether the Governor acted wisely; it is whether he acted lawfully. We conclude he did not," Justice Brian Hagedorn wrote in the majority opinion. "Pursuant to this straightforward statutory language, the governor may not deploy his emergency powers by issuing new states of emergency for the same statutory occurrence."

Guest Column: Honor/Shame society

By Pastor Eric Anderson, Lifespring Church, Crosby-Ironton Courier

Some thoughts and an assessment:

We are now in a Honor/Shame society.

There are crucial scientific and logical precedents which should have been considered before making decisions about society-altering executive actions, certainly more than, but not less than "mandated masking."

So it begs question: How did we get to this point where these were even allowed to be made, under "emergency orders? How did governors make this a mandate with so many exceptions and so little ability to enforce?

Answer: Because they expect us to enforce it among ourselves. And, sadly, it will happen by good ol' peer pressure.

How? We have moved from a right/wrong society, where virtues such as personal responsibility, courage, and hard work were expected, to a Honor/Shame culture (prevalent among nations in the east with pantheistic religions), where current values (honor/shame) have replaced transcendent virtues and principals.

This is Marxism, in it's current manifestations in the cultural, now the political realm. Multi-culturalism, social justice, identity politics, safety-ism, health, diversity are the ideal and normal lens of assessing what is good to celebrate (honor) what is bad to repudiate and change. (shameful) much must be said, but consider, through the "masking framework" alone…

Honor: Love you neighbor by wearing a mask (everywhere)

Shame: You hate your neighbor, you are self-absorbed, and lawless if your don't.

Honor: Obey the Experts in everything, they care about us.

Shame: Any violation, any objection, and you are advocating lawlessness and anarchy.

Honor: Safety and health above all.

Shame: Any denial of this, any appeal to Constitutional rights, distinctions and facts, and you only care about individual rights, which leads to injustice, lack of safety, and makes you a "super spreader", which is shameful.

Honor: You can worship God with a mask, or online.

Shame: You are a violator of Romans 13 and harming, your Christian witness if you disagree or add a…"but."

Honor: To be considered a good citizen" by agreeing with

them (experts) and obeying them.

Shame: To be a peasant: Any disagreement.

Or, how about this…

Honor: Blame Donald J. Trump for all our problems.

Shame: Any nuance, any defense of the former president and you are a shameful nationalist, you are harming your Christian witness.

In an Honor/Shame Culture: You are "Honorable" if you obey the current "values" of what is popular in culture, as passed down by the elites (in education, entertainment, big business, big tech, and government)… You are "Shamed" if you don't.

"Cancel culture" is one result but not the root.

Honor/Shame, in today's Marxist Group-think, is the antithesis of both our Nations foundation and the deeper foundation which informed it,

Christian Virtue; for in Honor/Shame, especially in a Masking society, all individuality is lost, your identity is seen by your identifications: skin color, gender, sexuality, and Masking.

Where is the arrival? Where is the utopia point? Where is atonement in an Honor/Shame Religion? How about forgiveness? Is peace ever achieved, ever secured?

Answer: There isn't. This type of Honor/Shame promises freedom yet gives only enslavement. Human efforts' to build "towers of babel" have always failed spectacularly (and destructively).

Mankind, without reference nor reverence for Holy God, produces more, not less guilt and shame.

As a friend pointed out, it is ironically "shameless."

Here is Truth: There is one Creator and we don't get to create our own truth. He alone reveals what is honorable and what is shameful. In him alone is found meaning.

Here is the Truth: We are shameful people, who deserve

our shame, but according to God's standard and before his Holiness.

The Good News: His Son, the Lord Jesus Christ, despised the shame of the cross by being covered in our shame, the right response from Holy God Wrath and judgment. He died in shame, rose in honor, offering us the forgiveness, peace, freedom, clear thinking, true justice, and the good life, now and in eternity, that which the government, elites, friends, in their ever evolving honor/ shame code, can never give.

Senator Bradley: Court's decision to overturn Evers' order is 'long overdue'

MADISON, Wis. — State Senator Julian Bradley, R–Franklin, issued the following statement Wednesday after the Wisconsin Supreme Court declared Governor Evers' health executive orders unconstitutional:

"Despite a cowardly delay, the Supreme Court finally got it right. Governor Evers' unconstitutional orders forcing a mask mandate on Wisconsinites were a clear abuse of power.

"The governor's brazen power grab became even more outrageous when he ignored the Legislature's resolution ending his order and continued to act unilaterally and illegally.

"The decision to finally uphold the rule of law is certainly welcome and long overdue."

Senator Bradley was the co-author of Senate Joint Resolution 3, which asserted the Legislature's authority to end the governor's executive orders that exceeded the 60-day limit.

How To Spend Another Round Of Massive Federal COVID-19 Aid?

Estimated COVID-19 Aid To Wisconsin From ARPA

Fund	Available Aid
State Fiscal Recovery Fund (SFRF)	$3.206 Billion
Local Fiscal Recovery Fund (LFRF)	$2.136 Billion
K-12 Schools	$1.541 Billion
Colleges and Universities	$560.2 Million
Capital Projects Fund	$188.7 Million
Other Funds	$1.068 Billion
Estimated Total	**$8.7 Billion**

Source: Legislative Fiscal Bureau NOTE: Aid estimates are not final

CHART SMART

By MacIver Staff

Under the recently passed American Rescue Plan Act (ARPA), the state of Wisconsin and other local units of government will receive another massive round of federal aid to ostensibly battle COVID-19 and help our economy recover from the government-imposed shutdown of our businesses and our way of life.

Wayfair and Child Trafficking? The Rabbit Hole Goes Deep.

Wayfair has been accused of being a front for child trafficking through the selling of outrageously expensive items. Here's how this story leads to a deep and disturbing rabbit hole.

By Vigilant Citizen

The "Wayfair conspiracy" or "Wayfairgate" has been making rounds online on Reddit, Twitter, Instagram, and Tik Tok. And, the more internet sleuths uncover bizarre details, the more the conspiracy is gaining steam.

The controversy began when a Redditor named PrincessPeach1987 made a post in the /r/conspiracy subreddit about storage cabinets sold by seller WFX Utility on Wayfair priced in the $12,700-$14,500 range. These items have bizarre distinctive names such as "Neriah" and "Yaritza" (which is odd for "industrial cabinets"). The user (who later stated that she was "involved in a local organization that helps victims of human trafficking") suggested that this might be a front for child trafficking.

In the same thread, a Redditor named Forsaken-Clock wrote that they reported the items to the human trafficking hotline and that a case was reportedly opened. Approximately six hours after the post was made on Reddit, all the items mentioned in the post were removed from the site, although the pages could still be accessed via Google Cache (not anymore).

The conspiracy quickly became viral, forcing Wayfair to deny the rumors, while promptly removing all suspicious items from its listings. A few days after, Snopes chimed into the controversy with one of its legendary "fact-checks", which, to some, is only further proof that there's actually something going on there.

Is this a wild conspiracy theory or was an actual child trafficking network exposed? Here's a look at the deep rabbit hole that is the Wayfair conspiracy.

Suspicious Items

The entire Wayfair debacle began when a user who was looking for high-end storage cabinets (and thus filtering results by highest price first), found bizarre articles with ridiculously high prices.

These item listings were deemed suspicious for several reasons. First, they appear to be grossly overpriced compared to similar items. Second, several listings had the same exact picture and the same specs but with different prices and item names. Speaking of which, these item names matched the name of actual missing girls – complete with rare or unique spellings.

It should be noted that some of these girls are not missing anymore (either found safe or dead). However, there appears to be a strange correlation between the name of these items and the name of actual missing girls – as if these names hinted to the actual purpose of these items.

As the story gained steam, other internet sleuths discovered more suspicious items on Wayfair. For instance, these throw pillows cost nearly $10,000.

Nearly identical throw pillows that are grossly overpriced.

The item description of these pillows appear to be automatically generated and contain no possible explanation for their exorbitant price.

No passport required?

The same company also sells products that are nearly identical at widely different price points.

One shower curtain costs $9,999 while the other costs $99. The difference: The more expensive one can be personalized with a word. I'm not a personalization expert, but I don't believe that printing a name on a shower curtain costs $9,900.

Some explained these prices as a "glitch" or as a way of hiding out-of-stock items. I can guarantee you something: Massive online stores such as Wayfair do not experience massive pricing "glitches" and the process of tagging an item as "out-of-stock" is either automated or only a click away. In other words, there is absolutely no need for coming up with crazy prices.

Not the First Wayfair Controversy

In 2019, Wayfair employees organized a massive walkout because it was discovered that the company sold furniture to ICE detention centers.

Hundreds of employees signed a letter stating that Wayfair has a contract worth $200,000 of bedroom furniture with BCFS Health and Human Services that would be distributed to a facility in Carrizo Springs, Texas. That's a bizarre contract to have for a "higher-end" online company. And, considering the fact that, for years, the massive flow of undocumented migrants has been a gold mine for child and human traffickers, the association is strange. For instance, it was recently reported that the U.S. government "lost track" of thousands of migrant children in the past years.

who paid big bucks for certain abused children. Wayfair and Child Trafficking? The Rabbit Hole Goes Deep. – The Vigilant Citizen

Think this was just a conspiracy theory? Here was the testimony of a brave Trafficked Survivor who claimed that as a child, she was strapped inside one of those Evergreen human trafficking containers: Human Trafficking Survivor Exposes Secrets Of Evergreen Shipping Containers, CPS & More!

Evergreen was believed to not only be carrying trafficked children, but Weapons of Mass Destruction. Many other ships that were blocked in the Suez Canal last week were also discovered to be carrying weapons – believed to be used to start a war in the Middle-East. Why? The weapons were going to be given to the Muslims by the Israel Mossad.

Human traffickers were being arrested and cartels busted – losing critical income for their owners worldwide. The Deep State Operation was said to have lost 400 million $ an hour while the ships were stuck for a week – that would pale in comparison to what those children were undergoing.

Evergreen vessels were having problems in ports all over the world. Why? Why were Special Ops US Navy Seals magically on the scene to rescue the children? Was the ship purposely run aground? It was rumored that holes in Microsoft software allowed someone, or ones, to hack into the Evergreen ship software, take over the steering and run it into the bank.

We may never be given the whole story. So far the Evergreen ship's Capitan in the Suez Canal has refused to cooperate. Now why on earth would a Ship's Captain not cooperate, unless there were major reasons? Won't hand over the black box?

Why would a vessel of that size from Taiwan list it's first destination as the Netherlands? Why would the below news article NOT mention Amsterdam? (Only Dutch) Lots of significant signals and clues were being released. Egypt could seek $1 billion from ship Ever Given: https://www.usatoday.com/story/news/world/2021/04/01/suez-canal-blockage-egypt-could-seek-1-billion-ship-ever-given/4833205001/

Guido Fawkes Telegram on Thurs. 1 April: "Ever Given has been boarded by the US Navy Seals and they have opened several cargo containers with live and dead inside. The vessel is in Bitter Lake and the Navy is performing unloading procedures. No images will be leaked, but I have been sent one."

Found on Evergreen Ship Blocking Suez Canal *cont. from page 1*

The Fort (United States of America) is in Peril of Falling!

Before wireless communication was invented, flags were used for communicating. Flying the flag upside-down alerted those outside that they were about to lose the fort to invaders. Today this country is at risk of being taken over by the left wing loonies and the socialists leading to the destruction of our constitution and everything it stands for. I'm calling every Patriot who has the Stars & Stripes and has a pole to fly it should, as a show of support for this country and its flag. Fly your flag "upside-down" 24 hours a day, 7 days a week STARTING MAY 1st until the villains are beaten back & true law & order is restored.

Bitcoin

"Vanity of vanities, saith the Preacher, vanity of vanities; all is vanity." Ecclesiastes 1:2

By Riley J. Hood—Milwaukee County Constitution Party

I first heard of bitcoins in 2,010, when I studying at ITT Tech. I thought they were a communist plot, an attack on the value of a dollar. All of the millennials loved the idea, which sunk the animosity in deeper. The Madison pot-head Segway Jeremy facilitated his attempted crimes, trying to buy poison with bitcoin.

Before bitcoin became the standard form of "electronic credit," there were several forms of "crypto-currency," electronic bits of information code trying to pass itself off as money. In 1992, Cynthia Dwork and Moni Naor proposed monetizing computational puzzles. E-cash was proposed by David Chaum and Stefan Brands. Adam Back developed "hash-cash" and Nick Szabo introduced "bit-gold." Wei Dai introduced "b-money" which was the immediate forerunner to bitcoin.

The domain name, is other words a webpage, bitcoin.org was registered on 8/8/2008. Bitcoin is the offspring of an article called, "Bitcoin: A Peer-to-Peer Electronic Cash System" under the fake name Satoshi Nakamoto. To this day, no one knows who SN really is, and theories abound. In January of 2009, the e-cash community started asserting it was a viable one-world alternative to the failing fractional reserve banking systems most nations have. On January 9, 2009 the first bitcoin client was another webpage called Source Forge, and it has been e-tulipomania from there. (That is a compliment, as tulips have more value.)

According to Wikipedia bitcoin value was set at, "10,000 BTC used to indirectly purchase two pizzas delivered by Papa John's." "At this point, Bitcoin had no real monetary value," says Mark Grabowski, from Adelphi University and author of "Cryptocurrencies: A Primer on Digital Money." "Bitcoin is following principles of economics and principles of market efficiency," says Hemang Subramanian, from Florida International University. "It is an asset that is not controlled by a central entity, that is secure, international and fungible, liquid and is available in a limited supply for trade."

According to US News' Coryane Hicks, who wrote on September 1, 2020, "From Humble Beginnings in 2008 to its 2017 price peak, Bitcoin has taken investors and the world for quite the ride. In just over a decade, it's spiked and crashed and rallied and fallen again." Coryane writes, "Once Bitcoin became available on exchanges in 2010, it became easier to buy, sell, trade and store. Thanks to these exchanges, bitcoin could also be priced against the US dollar." "From a low of a few cents in 2010 to the all-time high of late 2017 when each bitcoin touched US $20,000, Bitcoin has come a long way and continues to dominate the cryptocurrency markets." She states," Today, one bitcoin is worth a little less than $12,000."

This doesn't represent an achievement, or make bit-coin anything other than worthless. It is a monument to human stupidity, not only from computer geeks, but our own federal government devaluing our currency. Regarding our currency, we started with gold and silver coin. Intrinsic value. We then went to Treasury Notes tied to the Gold Standard. Then since the Nixon era, we have had "petrol-dollars," in other words unbacked printed paper. We have racked up a national debt have suffered massive inflation as a result. Ever since Bush43, the fed has racked up debt at record pace because even printing took more time and effort than clicking a few buttons.

There is nothing more treasonous, useless and worthless than bitcoin. Plastic coins from Chucky Cheese's are worth more, but they don't accommodate America's thirst for racking up debt like electronic credit does. The people involved in bitcoin are global socialists, whatever their real names are.

Our Constitution Party Platform states, "Article I, Section 8, Clause 5 grants only to Congress the power "To coin money, regulate the Value thereof," with no provision for such power to be delegated to any other group. Congress began immediately to fulfill this obligation with the Mint Act of 1792, establishing a US Mint for producing Gold and Silver based coin, prescribing the value and content of each coin, and affixing the penalty of death to those who debase such currency. Article I, Section 10: "No State shall-coin Money; emit Bills of Credit; make any Thing but gold and silver Coin a Tender in Payment of Debts;" Thus, the Constitution forbade the States from accepting or using anything other than a Gold and Silver-based currency." If States can't do it, neither should cyberpunks. Money functions as both a medium of exchange and a symbol of a nation's morality.

The Constitution Party of Wisconsin, a recognized political party, promotes the Biblical principles referred to in the Declaration of Independence and United States Constitution. We promote these principles by guiding our members into positions of civil authority.

CPOW is:

- 100% Pro-Life-We will re-secure the Right to Life.
- 100% Pro-Family-One Man, One Woman marriage.
- 100% Pro-Gun-We reject any form of gun control.
- 100% Pro-Constitution-We will cut the federal government down to Constitutional size.
- 100% Pro-America-We favor American Liberty, America's economy and American energy for the American People.

The Boulder Shooter: Islam in Action

"Deliver me, O Lord, from the evil man: preserve me from the violent man;" Psalm 140:1

By Riley J. Hood—Milwaukee County Constitution Party

The Swamp creature Andrew McCabe recently said on CNN.com, "mass shootings have become part of the American experience and it is completely unique to us," and then he calls for gun-control. McCabe is a liar: in many nations around the world mass murders are being perpetrated against unresisting victims. Not only that, the history of the 20th Century is full of examples of industrialized mass murder, where the prerequisite was citizen disarmament. Not only that, the same socialist regimes doing the disarming perpetrated the mass murders.

According to CNN, "The suspect" in the Boulder shooting is another Muslim. CNN posted on March 24th, 2021 Ahmad Al Aliwi Al Issa was "identified by authorities Tuesday as the gunman who opened fire at a King Soopers grocery store in Colorado, killing 10 people including a Boulder Police Officer." The Boulder PD won't say Islam is the reason, and the Democrats are using this man's Jihad as a call for victim disarmament. In other words, the only thing wrong with America is you bearing arms.

CNN posts, "Alissa was sentenced to one year probation and 48 hours of community service after being found guilty of third-degree assault in 2018 for an incident that occurred the previous November, according to the Colorado Bureau of Investigation's database. The case stemmed from an incident in which a then-18-year-old Alissa was accused of attacking a classmate at Arvada West High School. A report from a police officer included in the case file says Alissa "got up in (a) classroom, walked over to (the) victim & 'cold-cocked' him in the head.

Alissa "got on top of (the victim) & punched him in (the) head several more times," the report says, adding that the victim "had bruising, swelling & cuts to (the) head, as well as pain."

"No witnesses could see or hear any reason" for the attack, and Alissa said the victim "had made fun of him & called him racial names weeks earlier," the officer wrote." (This author defended

Made in the USA

"Let him that stole steal no more: but rather let him labour, working with his hands the thing which is good, that he may have to give to him that needeth." Ephesians 4:28

By Riley J. Hood—Milwaukee County Constitution Party

My home town of Milwaukee, while known as "beer town" from the brewing of swill by Miller, Pabst, Schlitz and Blatz: was also known as "The machine shop of the World." www.hmdb.org has an article about "The Machine Shop of the World Historical Marker." They write, "In the early 1900s, Milwaukee was the 'Machine Shop of the World' and the Menomonee Valley was its engine."

The valley" aka Pigsville, was named after the slaughterhouse smell from the, "Plankinton Packing, Albert Trostel leather, Pfister-Vogel Tannery, Allis Chalmers, Falk Corporation and Milwaukee Solvay Coke and Gas Co. Half of these were located in the Menomonee Valley but only one remains today." That company is Falk. It would be better to have the industry here than a historical marker that we were once great. Today, Milwaukee is known for communism, crime, booze and drugs not much else.

Made in America means made with American resources, by American workers, at manufacturing facilities owned by Americans, located within our borders. Regarding the Christian Work Ethic: Training people, and having people produce a useful product while providing for their families is an important part of American Patriotism. While mining, agronomy and service sector jobs are respectable in every way, it is industrial manufacturing that provides the economic muscle that makes a nation strong. Why? Because manufacturing allows you to multiply your God-given resources by your God-given creativity. Wheat is made into flour and bread, copper is fashioned into copper tubing, copper wire, copper coins and copper pans. The applications could fill a library.

Unscrupulous people have been shipping American companies and American work overseas, for decades. These people are at heart un-American. Thomas Jefferson described their ilk, "The mere spot they stand on does not constitute so strong an attachment as that from which they draw their gains." Much of the manufacturing that is still here within our borders is foreign owned. Having the jobs here is fine, but the foreign ownership is not. If our American business owners are not patriotic citizens, then the Taiwanese at Fox-Con, or the Japanese at Honda won't be, and the Chinese certainly won't be. We affirm that the owners of business on American soil ought to be American citizens.

The Milwaukee County Constitution Party wants manufacturing brought back to Milwaukee. We see our fellow citizens and the American working man as more than bargaining chips for multinational corporations. We affirm there is no constitutional basis for foreign aid. It has won us no friends, and is a drain on our taxpayers. We object to firing American citizens and replacing them with aliens, or worse yet illegal aliens, who have an adverse impact on our economy, and lower the wages of American workers. We oppose the abuse of the H-1B and L-1 visas. We favor a moratorium on immigration to the United States, except in extreme cases until the availability of federal subsidies of foreigners and American unemployment is reduced to zero. Not just "black unemployment" or "minority unemployment," which is reflective of affirmative action, but ALL unemployment.

Tariffs are a constitutional source of revenue and wisely administered, are an aid to preservation of the national economy. Since the 1934 Trade Agreements Act, the United States government has engaged in a free trade policy which has destroyed our industry. The libertarian policy of borderless anarchy has destroyed America's economic self-sufficiency, impoverished American families, undermined American communities, and diminished America's capacity for economic self-reliance, and the provision of national defense. The Constitution in Article I Section 8 states, "The Congress shall have Power To lay and collect Taxes, Duties, Imposts and Excises" and "To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes;" Duties and imposts on imports are known as tariffs. Anyone who hates tariffs hates the Constitution, and hates America, and hates you.

The Boulder Shooter

cont. from page 14

himself at MPS by doing such things, and as a juvenile I was punished with far more than 48 hours of Community Service.)

"A law enforcement official told CNN Alissa was not previously the subject of any FBI investigation and said it appears nothing in the federal system would have prohibited Alissa from buying a firearm." First off, background checks are never fool proof, and there is nothing in reality preventing a criminal from carrying out his crime: because it is their very nature, they must be stopped. It isn't a Policeman's badge that is compelling to a criminal, it is his gun, and his use of it. Because the police can't be everywhere, and a lot of destruction can happen in two minutes, the more armed citizens the better.

CNN states, "The family emigrated from Syria in 2002, the brother said. They have lived in the Arvada area since 2014." That is after 9/11. The perpetrator has lived most of his life in the United States, but thanks to affirmative action, he is still a Muslim and has not assimilated. He isn't here to be an American, he is here to take over. The CNN article makes a litany of excuses for Al-Issa, "high school bullies made fun of Alissa's name and for being Muslim and that may have contributed to him becoming anti-social."

There are several things the Milwaukee County Constitution Party has to say. First, Al-Issa as young as he is was already a violent criminal. The gun didn't fire itself. Second, even if you are being called dirty names or pejoratives, you have no right to assault the name caller, much less murder them, because you are politically correct and they are not. Third, regarding Islam, many non-practicing Muslims suddenly dedicate themselves to Allah, and this is how they do it, just like Omar Mateen, or Ziad Jarrah.

The world is a more dangerous place than it was on January 19th, 2021 because Joe Biden is a senile, weak, wimpy, empty-head. Everyone from border crashers, to BLM, Antifa and Jihadists are ramping up their activities because they know it is far easier to get away with murder under O'Biden's criminal-centered mis-leadership. Finally, never, never, never disarm. To do so is to surrender to the criminals and the liberal allies.

The Muslim Report: France

"The Lord is a man of war: the Lord is his name." Exodus 15:3

By Riley J. Hood—Milwaukee County Constitution Party

According Barnabas-AID, there are an average of three acts of vandalism and other attacks against Churches in France every day. In March 2019, a fire was started at a Cathedral in Lavaur and excrement was smeared in the shape of a cross on the wall of a Church in Nimes. A Church in Dijon had its interior vandalized.

On October 29th, 2020 a Muslim Tunisian murdered three people with a knife at a church in Nice. This demented man was shouting "Allah Akbar" and he is considered "a good Muslim" because he was murdering infidels. According to

Continued on page 20

The Muslim Report: Syria

"And the Spirit and the bride say, Come. And let him that heareth say, Come. And let him that is athirst come. And whosoever will, let him take the water of life freely." Revelation 22:17

By Riley J. Hood—Milwaukee County Constitution Party

On October 9th, 2019 the Turkish Military, our NATO allies, armed with western technology, invaded northern Syria on operation, "Fountain of Peace." As usual, Christian areas were shelled and Christians were among the dead. A Syrian Pastor called the invasion where thousands were killed and millions displaced an, "ongoing man-made catastrophe."

Bassam Ishak of the Syriac National Council reports that Pro-Turkish Muslims are conducting ethnic cleansing and forcing Christians from their farms, seizing or destroying their harvests. Ishak said they are, "repeating what they did in Afrin," recalling the September 2018 Turkish invasion. Ishak continues, "The Christians in Ras al-Ain own one third of the agricultural land there." Christians are being terrorized, and 70,000 have fled from Ras al-Ain alone. Many Syrian Christians have fled to Lebanon. On October 21st 2019 the Army of Islam called for treating Christians as second-class citizens and forcing them to pay the Jizya. All this in spite the assurances by Recep Tayyip Erdogan that minorities would be respected. Islam affirms the right to tell lies that advance Jihad.

Some groups are saying that until the Arab Spring, Christians were a respected minority and were treated as equals by the Muslims. That is a lie. I find the regime of Bashar Al-Assad to be every bit as disgusting as his father Hafez Al-Assad's rule of Syria, and control of most of Lebanon was. They are both Muslims. However, before the 2011, an estimated 10% of Syrians were Christian, and the Assad's have a better track record than ISIS, the Kurds or the Al Nusra Front have in their treatment of Christians. Still even the best treatment most Muslims are willing to offer is second class status, better than genocide, but it still stinks.

Continued on page 16

The Muslim Report: Ethiopia

"Be sober, be vigilant; because your adversary the devil, as a roaring lion, walketh about, seeking whom he may devour." I Peter 5:8

By Riley J. Hood—Milwaukee County Constitution Party

Southern Ethiopia is now dominated by Muslims, and some have ties to Somalia. From 2018 through 2019, 45 Christians have been murdered and over 800 have fled after their churches, crops and homes were burned.

There is a new Islamic Jihad group called the Oromo Liberation Army. According to Barnabas-AID, on November 1st, 2020; the OLA murdered 54 Amhara in the village of Gawa Quanga. They burned 120 houses, and people have fled the area. The ethnic Amhara's are Christians and they are being ethnically cleansed, the dead were children, women and the elderly.

Ethiopia was dominated by the Coptic Church, but then again Nigeria was over 80% Christian fifty years ago. At one time Asia minor was Greek and all Christian, and today, the bloodthirsty Turk controls the area they stole, and it is 99% Islamic. See where this is going? The Devil hasn't changed, and neither has Islam.

The Milwaukee County Constitution Party asserts that it is time for Christian men who are able bodied to become familiar with firearms, and provide for the defense of their community's families, elderly, women and children. This author has a ccl, and carries. He also has rifles and a shotgun. God does do miracles of deliverance, but just like you need no revelation to shower, or brush your teeth, no need no special vision to provide for defense, because the Scriptures already command that you do.

The Muslim Report: Lebanon

"The trees of the LORD are full of sap; the cedars of Lebanon, which he hath planted;" Psalm 104:16

By Riley J. Hood—Milwaukee County Constitution Party

Lebanon has nearly 5,000 years of history. The area is mentioned in the Bible when the area was Phoenician. Cities such as Tyre and Sidon are mentioned. After the Crusades, Lebanon still had many Christians in the area.

Under Ottoman rule, the 1860 Mount Lebanon Civil War resulted in 20,000 Christians being killed: 380 Christian villages and 560 churches were destroyed by the Druze and Muslims. After liberation from Ottoman Rule, the area was part of the French Mandate, and in 1920 a modern state was created. In 1944, with France under Nazi occupation, the French government in exile officially transfers authority to Lebanese officials. In 1958 France asked for US troops and the Marines landed with no major incidents.

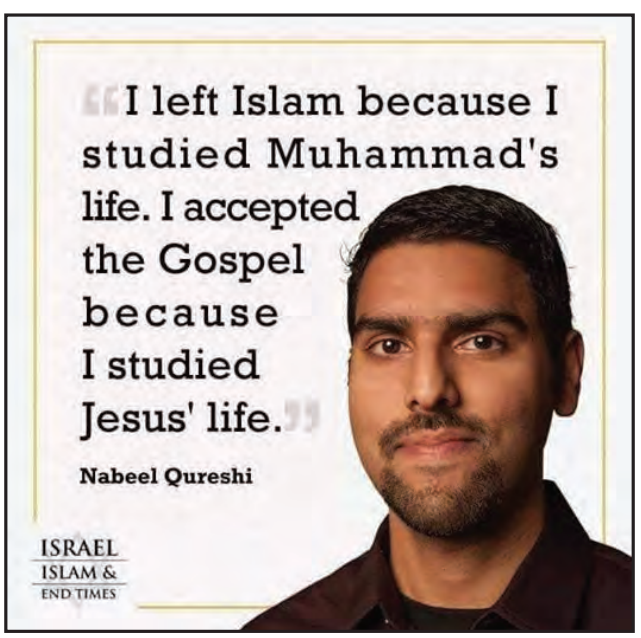
Lebanon suffered a civil war from 1975 to 1995. By 1982 over 300,000 Lebanese citizens were murdered by Muslims and Druze, once again. In 2019 the police in Lebanon launched a 10month investigation that thwarted a plot by Muslims to target the Military, Christians and Churches. ISIS was busted on two occasions with hiding explosives in tubs of cheese, shipped into Lebanon from Syria.

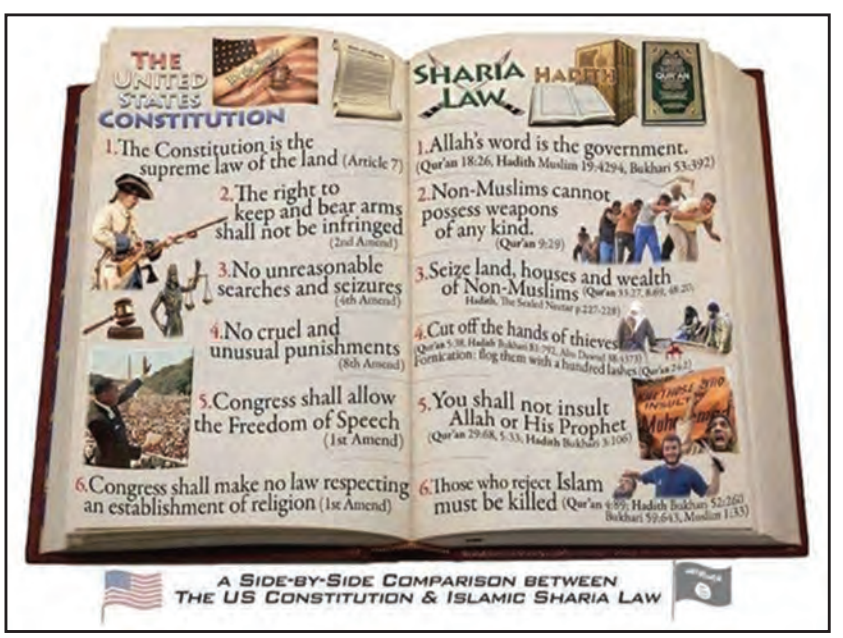
In 2020, the government locked the country down. People lost their jobs and starved. The result has been hyperinflation, a return to barter and the crime rates going up. Law and order are enforced by various "militia" groups, most of them Islamic, or Druze. Now Christians are less than 20% of the nation, and the Christian Phalange has been broken up under Syrian occupation and hegemony. (Syria invaded Lebanon in 1976.) All this benefits Amal, Hezbollah and other Islamic Jihadists, as all militia groups except Hezbollah (Hezbollah was founded by Iran) were ordered to be disbanded in 1991.

According to CNN, "The explosion took place at 6:07 p.m. local time Tuesday (8/4/20) near Beirut's port and central district." "A crater created," according to Plant Labs Inc., "appeared to be roughly 405 feet, in diameter, well over a football field in length." According to Sky News, after 145 people died, "Dozens of protesters threw stones at security forces and set tires on fire near the country's parliament in central Beirut on Thursday." Sky News adds, "300,000 people, more than 12% of Beirut's population," are homeless. 2750 tons of ammonium nitrate had been seized from a Russian cargo ship that had been impounded in 2013.

The ethnic cleansing of Christians didn't stop with the Civil War ending, according to a local Pastor, "They see no hope for their children in Lebanon, there will be no congregation, and only stones to testify that were Christians here once upon a time." I assert that Muslims will tear down the graveyards as well, they can't abide reminders about how their religion is false.

During the Lebanese Civil War, the Marines went to Beirut in June of 1982 and arrested the PLO, that was trying to take over the remainder of country. PLO Jihadists were turned over to the UN, and then sent to Tunis and then set free so they could fight another day. About three weeks later, US, French and Italian peacekeeping force arrived. (The French lost 58 paratroopers.) In August, the first Marine died, a demolition man, who was disabling a "land mine." Next, I got a call from a friend named Chuck, he told me Dave Gander, a man who was two years ahead of me in school, and in the USMC, died holding his rifle under a jeep, waiting for UN permission to return fire that never came. That was 1982. In April of 1983, our Embassy was attacked by a truck bomb, and 63 people were killed. On October 23rd, two days before Grenada, 1/8 Marines were attacked by the umpteenth truck bomb, but defenses were reduced to one sentry with an M-16A1 thanks to UN Policy. 241 people died, mostly Marines from HQ Company died in the rubble. I knew over a dozen Marines from 1/8, and more from my battalion, and other battalions that paid with their lives for a half-baked policy regarding Islam. When I came home, I tried to it out of my mind, but I think about them every day. I write the Muslim Report to help Americans identify the enemy, and to remember people that many Americans would rather forget.





Sweden was the only country without these measures so it should have seen a massacre!

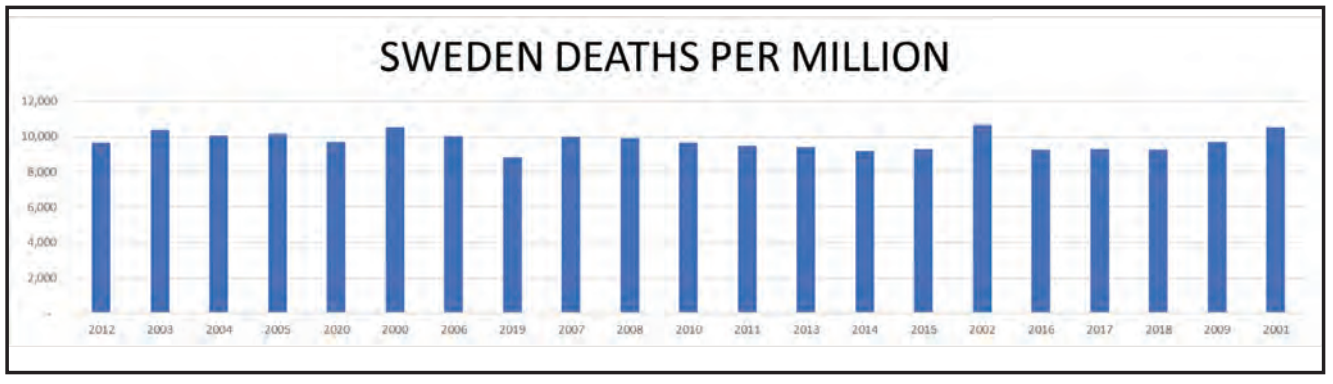
By Sanjeev Sabhlok

OBSERVATIONS

Does anyone apart from me think that this pandemic is grossly overblown? If that is so (and it has been obvious to me since at least May 2020), then why are we being lied to on such a large scale by our political parties, politicians, government "health officers", academicians, media and Big Tech?

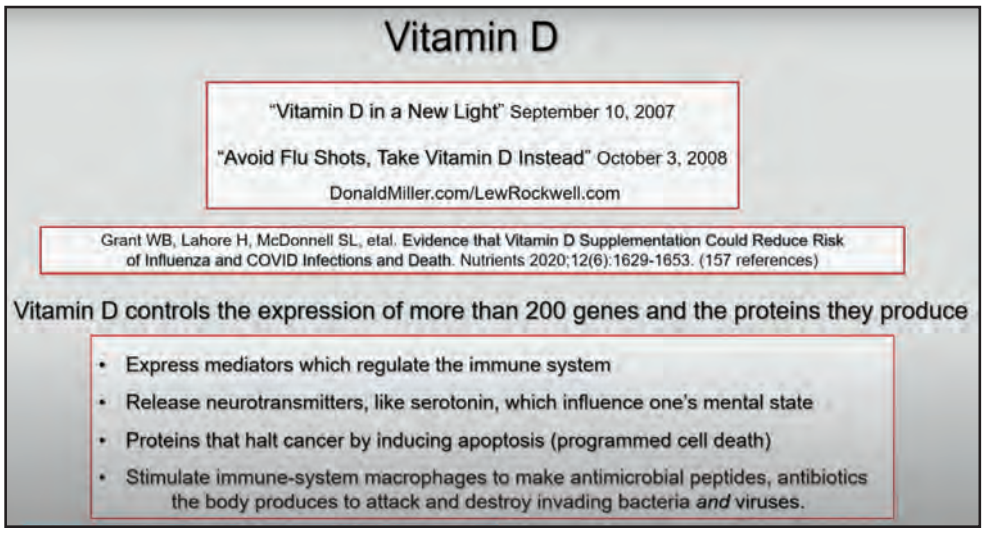
Will it now be standard practice for us to look at 2+2 and claim it equals 50? What are we to teach our children in schools about this pandemic - that it was the world's biggest thing since Spanish flu? How are we going to manipulate and massage the data to make such claims? No matter which way anyone looks at it, this is not even a once-in-10 year pandemic - a mere blip on the radar of pandemics. Any honest child can see through this but why are all our adults fixated on this thing?

See also my 30 December 2020 article in The Australian for a detailed analysis. Indeed, when the "dry tinder" effect is incorporated, we have a mere additional 3-4% deaths in Sweden from this pandemic. Michael Levitt, Nobel prize winner, has personally confirmed that. If it was the Spanish flu, we'd have had at least 200% additional deaths (it killed 210 million adjusted for today's population, compared with our annual 60 million deaths).



AS A FIRST STEP, CAN WE CALM DOWN, PLEASE!

I've started visiting my local shopping centre to talk to people and to study their state of mind. They are in deep mental pain - they are suffering from something close to PTSD and many will never recover. Someone has to stop this madness!



Muslim Report: Syria

cont. from page 15

On November 11th, 2019 a church minister and his father were murdered by "unknown" most likely Muslims on as they were driving from Qanishli to Deir al-Zor to help displaced Christians rebuild their homes, shops and lives. Later the same day, 3 bombs were detonated in five minute intervals in Qamishli, first in the Kurdish quarter, next in the market and the last at a Christian school. Five people were dead on the scene and 26 people were injured.

In 2020 the US sanctions as opposed to the war were being blamed for the Islamic misery. "It is a disaster on all levels" said a Pastor "The sanctions hit the economy in such a way that it made it collapse. No fuel means no electricity, no bread, no cars to move and no transportation of goods. These days even bread is only being sold with what is called a smart card! So it is limited same as rice, sugar, vegetable oil and so on," The same Pastor reports that medicine is scarce, and fires are burning down the coastal forests. Barnabas AID, being a UK group wants the US to lift sanctions, so they can send in aid. Maybe they should petition our federal government for an exception to made in their case, as the US doesn't want terrorists or Al-Bashir to receive funding.

The Milwaukee County Constitution Party asserts that while sanctions may be hurting some of the few Christians left in Syria, they are also hurting the Muslims. Our decades of foreign aid to Muslims did not buy us any friends, only more death to America chants and Great Satan slander. The Milwaukee County does assert that sanctions should also by applied to bloodthirsty Turkey. After all, any help we could offer would only degrade these "superior beings."

COVID-19 Vaccine Tested on Babies Even as Death Toll Mounts

By Dr. Joseph Mercola

STORY AT-A-GLANCE

• Mid-March 2021, Moderna started testing its mRNA COVID-19 vaccine on children between the ages of 6 months and 11 years

• As of March 5, 2021, the U.S. Vaccine Adverse Event Reporting System (VAERS) had received 31,079 adverse reaction reports for COVID-19 vaccines, including 1,551 deaths

• Using March 5 VAERS statistics, assuming all deaths have been reported as required, the lethality rate of COVID-19 vaccines is 0.0028%

• CDC statistics puts the death rate following COVID mRNA vaccination at 0.0024% -- significantly higher than that following influenza vaccination at 0.0000265%

• There are compelling reasons to suspect these vaccines may contribute to death further down the line, perhaps months or a few years into the future. Those ending up with permanent disability as a result of these vaccines will be at increased risk of early death, and there's no telling how these vaccines might impact the longevity of children

If early statistics are any indication, we are facing the greatest public health calamity in modern history. No, I'm not talking about a third, fourth or fifth wave of COVID-19. I'm talking about the current vaccination campaign. I have no doubt that deaths caused by COVID-19 vaccines will end up far exceeding the number of actual COVID-19 deaths.

The greatest tragedy here is that while COVID-19 kills already unhealthy elderly individuals who are just years from their natural death, the vaccines are killing the young and healthy who typically have many more decades to live. From my perspective, there's simply no justification for this. There's no "greater good" argument that can ever make this type of tradeoff OK.

Equally unjustifiable is the fact that death within months of a positive SARS-CoV-2 test was automatically pegged as a COVID-19 death, whereas death within days or even hours of the vaccine is shrugged off as coincidental, no matter how many times it happens. It is reprehensibly inexcusable the way these deaths are being attributed.

Now, these experimental gene therapy "vaccines" are being tested on young children and even babies as young as 6 months old, the ramifications of which are wholly unknown.

According to Forbes1 and The New York Times,2 Moderna has officially started testing its vaccine on children between the ages of 6 months and 11 years. A total of 6,750 children will be included in the trial. Testing on 12- to 17-year-olds began in December 2020, the data from which are still unpublished. Considering what's happening in the adult population, testing on young children and babies seems extremely premature and risky beyond belief.

Deaths Mount by the Week

Unfortunately, there's no simple way to keep tabs on vaccine-related deaths. Each country has its own reporting mechanism, and vaccine reactions aren't always properly reported.

In the U.S., for example, past investigations have shown only somewhere between 1%3 and 10%4 are ever reported to the Vaccine Adverse Event Reporting System (VAERS), which is a passive, voluntary reporting system.

Granted, unlike other vaccines, deaths following COVID-19 vaccination are supposedly required to be reported,5 so perhaps VAERS data are more reliable for COVID-19 vaccines than for others. As of yet, though, it's impossible to confirm that all related deaths are in fact being reported.

VAERS data processed as of March 5, 2021, show a total of 1,551 deaths. (This includes all locations, ages, genders and location of vaccine administration.) At that time, a total of 31,079 adverse reaction reports had been filed for COVID-19 vaccines, which means deaths account for 4.99% of adverse events. Life-threatening events account for 3.56% of total side effects reported, and permanent disability accounts for 2.10% of total side effects reported.

Comparing COVID-19 and Vaccine Death Rates

Another difficulty is matching different data sets together. For example, to put these numbers into greater context, you'd want to know how many people have been vaccinated as of that same date, March 5, 2021.

This too can be tricky to determine, as vaccination statistics6 will often use breakdowns such as the number of vaccinated people per 100, or vaccine doses administered, which doesn't tell you how many people were vaccinated, seeing how some vaccines require a single dose while others require two.

Accepting those limitations, we can at least get an approximate idea. Using Our World in Data's statistics,7 as of March 5, 2021, 55.55 million Americans had received at least one dose. (Another graph shows that as of March 5, 28.7 million Americans were considered fully vaccinated, having received all prescribed doses. However, since side effects can occur after the first dose, I will use that statistic.)

Dividing reported deaths, 1,551, by the number of people having received at least one dose, 55,550,000, we end up with a reported lethality rate of 0.0028%. If only 10% of adverse events are reported to VAERS, we're looking at approximately 15,510 deaths and a lethality rate of 0.028%.

If only 1% are reported, there may be around 155,100 deaths, and vaccines may be killing 0.28% of all who get them. Again, while any and all deaths following COVID-19 vaccination are supposed to be reported, it's still unclear whether mandatory reporting is actually taking place.

While 0.0028% or even 0.28% might not seem like a

Continued on page 18

Dr. Fauci *cont. from page 1*

a so-called public servant.

The question begs, how did his financial net worth triple in just one year?

He certainly earns a bit appearing on mainstream media and from speaking engagements but didn't bloviate into a $9,000,000 windfall.

Our source, an underpaid NIH lab technician, said Fauci wouldn't reveal specifics on how he—or anyone—could declare $9,000,000 in miscellaneous income, but proved he had by showing a certified copy of his 2020 tax returns.

"The Fauci you seen in public and the real Fauci are two different people. Fauci likes to get loaded, if you know what I mean. Weird for an old guy, but whatever. So, last month we're at the Barking Dog, a bar in Bethesda, about eight of us and Fauci after work. He's getting his drink on and pelting them back at a good clip. And, no, in case you're wondering, none of us at the table were wearing masks, including Fauci. So, he's had four, five or six and then starts bragging about all this money he's making, and some of us call bullshit. And he pulls from his briefcase a copy of his tax records and a recent bank statement showing over ten million bucks in the account," our source said.

He said he asked Fauci whether the money came from Covid-19 vaccination sales.

"He wouldn't say yes and he wouldn't say no, smirking the whole time. He admitted, though, he was going to make 10 times as much money in 2021," our source said.

RRN confirmed the source's identity and job, and contacted John McManus, co-owner of the Barking Dog. Mr. McManus said, "Dr. Fauci is a regular patron who enjoys his drinks."

3,964 DEAD 162,610 Injuries: European Database of Adverse Drug Reactions for COVID-19 "Vaccines"

By Brian Shilhavy, Editor, '*Health Impact News'*

The European database of suspected drug reaction reports, EudraVigilance, is now tracking reports of injuries and deaths following the experimental COVID-19 "vaccines."

Here is what EudraVigilance states about their database:

This website was launched by the European Medicines Agency in 2012 to provide public access to reports of suspected side effects (also known as suspected adverse drug reactions). These reports are submitted electronically to EudraVigilance by national medicines regulatory authorities and by pharmaceutical companies that hold marketing authorisations (licences) for the medicines.

EudraVigilance is a system designed for collecting reports of suspected side effects. These reports are used for evaluating the benefits and risks of medicines during their development and monitoring their safety following their authorisation in the European Economic Area (EEA). EudraVigilance has been in use since December 2001.

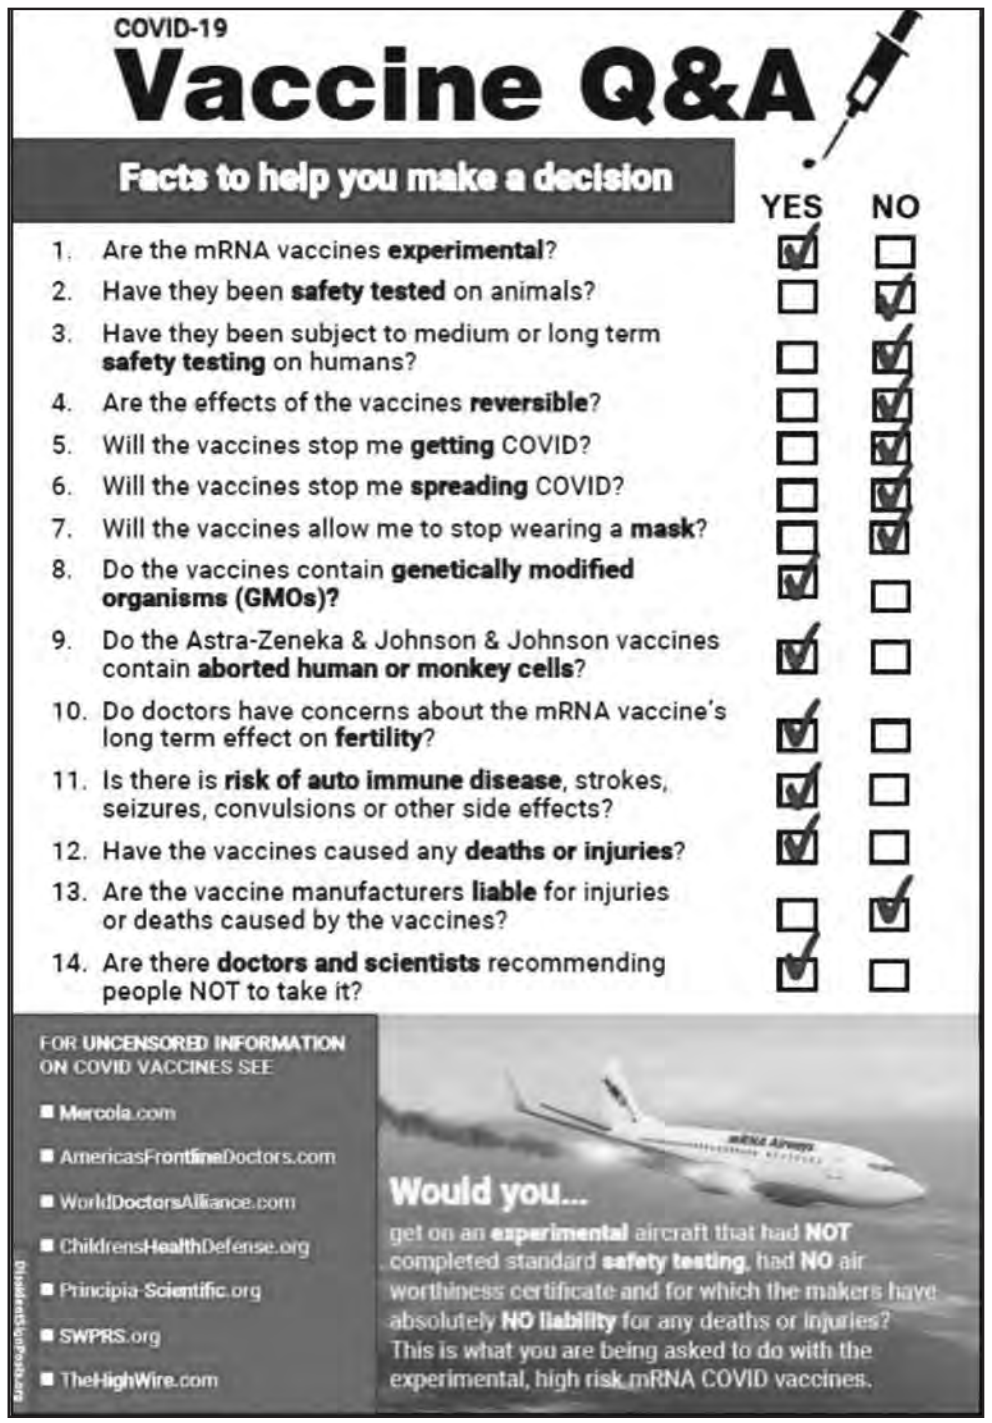
This website was launched to comply with the EudraVigilance Access Policy, which was developed to improve public health by supporting the monitoring of the safety of medicines and to increase transparency for stakeholders, including the general public.

The Management Board of the European Medicines Agency first approved the EudraVigilance Access Policy in December 2010. A revision was adopted by the Board in December 2015 based on the 2010 pharmacovigilance legislation. The policy aims to provide stakeholders such as national medicines regulatory authorities in the EEA, the European Commission, healthcare professionals, patients and consumers, as well as the pharmaceutical industry and research organisations, with access to reports on suspected side effects.

Transparency is a key guiding principle of the Agency, and is pivotal to building trust and confidence in the regulatory process. By increasing transparency, the Agency is better able to address the growing need among stakeholders, including the general public, for access to information.

Their report through March 13, 2021 lists

Continued on page 18



Vaccine Tested on Babies

cont. from page 17

shockingly high percentage of deaths, it's hard to justify even a single death of a young and healthy individual. For comparison, the overall noninstitutionalized infection fatality ratio from COVID-19, for all age groups, is 0.26%. Those under 40 have only a 0.01% risk of dying from COVID-19 if infected.8

As of right now, the vaccine may not match or exceed the lethality of COVID-19 itself, but we're only three months into the vaccination campaign. According to NPR,9 21.7% of the U.S. population had received at least one vaccine dose as of March 16, 2021.

There are compelling reasons to suspect these vaccines may contribute to death further down the line, perhaps months or a few years into the future. Those ending up with permanent disability as a result of these vaccines will be at increased risk of early death, for example, and there's no telling how these vaccines might impact the longevity of children.

If premature death occurs a year or more down the line, it's unlikely that anyone will suspect it being connected to the vaccine. Right now, even deaths that occur within 24 hours in people who were young and in good health are chalked up to coincidence, which is truly remarkable.

Comparing COVID-19 Vaccines With Flu Vaccines

Another way to judge the lethality of COVID-19 vaccines is to compare it to seasonal flu vaccines which, by the way, used to account for a majority of vaccine injuries. As reported by The Vaccine Reaction:10

"The death rate following COVID mRNA vaccination is much higher than that following influenza vaccination. The CDC's data allows only a ballpark estimation of the rate of deaths following flu vaccination. In the 2019-2020 influenza season the CDC reports that 51.8 percent of the U.S. population received a vaccine, which is approximately 170 million people.

VAERS reports that in the calendar year 2019 (not the 2019-2020 influenza season) there were 45 deaths following vaccination. To provide context, in 2018 VAERS reports 46 deaths, and in 2017 it reports 20 deaths.

The 45 deaths in 2019 are occurring at a rate of 0.0000265% when calculated using the number of vaccines given in the 2019–2020 influenza season. As of Feb. 26, 47,184,199 COVID vaccinations had been given with 1,136 deaths reported following vaccination, which is approximately a rate of .0024%."

Are These Deaths Pure Coincidence?

As of March 5, 2021, the youngest recorded death shortly following COVID-19 vaccination was 23.11 Among the more recent reports is that of a healthy 39-year-old mother who died of multiple organ failure just four days after receiving her second dose of the Moderna vaccine.12

The average age of death post-vaccination is 75 and older,13 which is near-identical to the age of death for COVID-19 itself. However, whereas COVID-19 primarily kills elderly in nursing homes who have multiple comorbidities, the vaccines are cutting lives short among elderly who appear to be in relatively good health.

Examples include baseball legend Hank Aaron, who died in his sleep 17 days after receiving the vaccine. He was 86. His death was reported as completely natural and unrelated to the vaccine.14

Another is that of boxing champ Marvin Hagler who, according to his friend Thomas Hearns, was admitted to the ICU due to side effects from his COVID-19 vaccination. (Hearns had posted on his Instagram and Twitter accounts that Hagler was in the hospital ICU "fighting the after effects of the vaccine" and that he wanted fans to pray for his recovery.15

His posts have since been removed, but a screenshot of a retweet16 by Tariq Nasheed is still available.) Hagler died shortly thereafter. He was 66.

I suspect that once more celebrities start dying from the vaccines, more people might start to rethink their decision to get vaccinated. Mainstream media and industry-allied fact checkers are working overtime, though, to "debunk" any suggestion of a link between deaths and the vaccines.

Side Effects Range From Mild to Serious

Aside from sudden death,17,18,19,20,21,22 which is most serious of all, a range of other side effects are being reported, many of which will have a significant impact on quality of life. Examples of side effects reported after vaccination with Pfizer's, Moderna's and AstraZeneca's vaccines from around the world include:

Persistent malaise, Bell's Palsy, Extreme exhaustion, Swollen, painful lymph nodes, Severe allergic, including anaphylactic reactions, Thrombocytopenia (a rare, often lethal blood disorder), Multisystem inflammatory syndrome, and/or myocarditis, Miscarriages and premature birth. As of March 5, 2021, 85 cases of miscarriage or premature birth had been reported, Chronic seizures and convulsions, Severe headache/migraine that does not respond to medicationParalysis, Sleep disturbances,Psychological effects such as mood changes, anxiety, depression, brain fog, confusion, dissociation and temporary inability to form wordsCardiac problems, including myocardial and tachycardia disorders, Blindness, impaired vision and eye disorders, Stroke.

As reported by The Defender, March 5, 2021, while vaccine injury reports are growing in number, consistent trends have emerged, including the following:48

- Overall, 31% of deaths have occurred within 48 hours of vaccination
- People who report getting sick within 48 hours of vaccination account for 47% of deaths
- About 20% of deaths are cardiac-related

A majority of these side effects are from the Moderna and Pfizer vaccines, which use mRNA technology. The AstraZeneca vaccine uses a chimpanzee adenovirus vector genetically engineered to express the SARS-CoV-2 spike protein instead. However, while many hoped this vaccine would be safer than mRNA versions, this doesn't seem to be the case.

As of March 16, 2021, more than 20 European countries had suspended the use of AstraZeneca's vaccine, either in full or in part, following reports of deadly blood clots.49,50 According to a March 2, 2021, report51 by The Defender, U.K. data show the AstraZeneca vaccine actually has 77% more adverse events and 25% more deaths than the Pfizer vaccine.

Like AstraZeneca's vaccine, Johnson & Johnson's vaccine also uses an adenovirus vector to carry the gene for SARS-CoV-2 spike protein into your cells, thereby triggering your cells to produce this protein.52 Business Insider has created a comparison chart53 of the four vaccines currently available in the U.S. and Europe -- Moderna, Pfizer, AstraZeneca and Johnson & Johnson.

Concerned Doctors Speak Out

Sadly, the vaccine debate is nothing if not one-sided. Medical professionals expressing concern are roundly ignored, despite their growing number. Among them is cardiac surgeon and patient advocate Dr. Hooman Noorchashm, who recently sent a public letter54 to the U.S. Food and Drug Administration commissioner detailing the risks of vaccinating individuals who have previously been infected with SARS-CoV-2, or who have an active SARS-CoV-2 infection.

He's urging the FDA to require prescreening for SARS-CoV-2 viral proteins to reduce the risk of injuries and deaths following vaccination. He warns the vaccine may trigger an adverse immune response in those who have already been infected with the virus.

Immunologist Dr. Bart Classen has also warned there is troubling evidence suggesting some mRNA shots may cause prion diseases such as Alzheimer's and ALS,55 and Dr. J. Patrick Whelan, a pediatric rheumatologist specializing in multisystem inflammatory syndrome, has expressed concern about mRNA vaccines' ability to cause "microvascular injury to the brain, heart, liver and kidneys in ways that were not assessed in safety trials."56

Doctors for COVID Ethics Want Answers to Safety Questions

February 28, 2021, a dozen doctors and scientists with Doctors for COVID Ethics published an open letter to the European Medicines Agency (EMA), expressing a number of concerns about COVID-19 vaccines. It reads, in part:57

"We note that a wide range of side effects is being reported following vaccination of previously healthy younger individuals with the gene-based COVID-19 vaccines. Moreover, there have been numerous media reports from around the world of care homes being struck by COVID-19 within days of vaccination of residents.

While we recognize that these occurrences might … have been unfortunate coincidences, we are concerned that there has been and there continues to be inadequate scrutiny of the possible causes of illness or death under these circumstances …"

Navy Seals Rescue Over a thousand trafficked children and dead bodies out of shipping containers in the Suez Canal.

The marshall report

In an article titled, "Trafficked Children, Bodies, Weapons Found on Evergreen Ship Blocking Suez Canal", by Judy Byington, 4-2-2021- it states that over a thousand trafficked children and dead bodies have been rescued out of shipping containers in the Suez Canal by US Navy Seals.

"Sources say that as of this writing, children were still being rescued and bodies discovered in Evergreen's 18,000+ containers. The containers were on an Evergreen Corporation ship that blocked the Canal from Tues. 23 March to Mon 29 March, causing billions in lost revenue to shipping companies internationally.

"The Seals also found Weapons of Mass Destruction on the six story high vessel – which were believed destined to start a war in the Middle East.

"Finally by Tues. the Evergreen cargo ship was loosened and taken to Bitter Lake in Egypt. By order of the Egyptian President, the containers were taken off the ship and searched by US Navy Seals.

"Many other ships that were blocked in the Suez Canal last week were also discovered to be carrying weapons – believed to be used to start a war in the Middle-East. Why? The weapons were going to be given to the Muslims by the Israel Mossad.

"Human traffickers were being arrested and cartels busted – losing critical income for their owners worldwide. The Deep State Operation was said to have lost 400 million $ an hour while the ships were stuck for a week – that would pale in comparison to what those children were undergoing.

"Evergreen vessels were having problems in ports all over the world. Why? Why were Special Ops US Navy Seals magically on the scene to rescue the children? Was the ship purposely run aground? It was rumored that holes in Microsoft software allowed someone, or ones, to hack into the Evergreen ship software, take over the steering and run it into the bank.

"We may never be given the whole story. So far the Evergreen ship's Capitan in the Suez Canal has refused to cooperate. Now why on earth would a Ship's Captain not cooperate, unless there were major reasons? Won't hand over the black box?" Read full story here: https://truth11.com/2021/04/03/trafficked-children-bodies-weapons-found-on-evergreen-ship-blocking-suez-canal/

On March 29th, 2021, Navy Seal Michael Jaco put out a video on the Evergreen Ship giving his input stating "Evergreen Ship Will Be a Big Deep State Reveal!- Where Is the Ammo? Coming Soon as I Reveal Why! – Must Video!

Covid-19 "Vaccines"

Emissions Confusion

By Viv Forbes

What parallel universe are Australian politicians living in?

Their Net-Zero policy says we must reduce carbon dioxide emissions to induce global cooling.

Then their COVID closures and lockdowns destroyed the travel industry, thus slashing travel emissions.

Success - one industry approaches their zero-emissions goal.

Are they pleased? No, those who were locked down yesterday are today promised Queensland government travel vouchers to visit Cairns.

And the feds have already offered 50% air fare subsidies.

And now three levels of government collaborate to promote another travel emissions extravaganza – the Queensland Olympic Games.

All travel subsidies increase emissions.

Do they want more or less emissions? We are confused.

Maybe tourists will ride bicycles to Cairns and the Games buses, trains and planes will run on political hot air?

Is this the way tourists travel to Cairns in the net-zero world?

Flood Plains are for Floods

By Viv Forbes

Natural flood plains form where floods spread silt and mud in river valleys. Being flat, fertile, picturesque and usually supplied with surface and underground water, they attract farms, orchards and gardens. These are inevitably followed by roads, houses,

THE GREAT OUTDOORS: Environmentally safe energy: Who says so?

By Douglas H. Domedion

As I point my camera at the beautiful fall foliage they stick out as very foreign objects in the grand landscape that Mother Nature has given us country folks. Swinging my camera toward a flying flock of geese, the tall "white monsters" in the background ruin the image I'm trying to capture of wild and free wildlife. I have visions of a bald eagle or a red-tailed hawk getting whacked by one of those fast-moving blades coming down while he concentrates on a rabbit or a mouse on the ground.

In recent years there has been a big surge of interest in providing environmentally safe energy in New York state. About that, my many questions don't seem to have answers from the folks promoting huge wind and solar farms, or anyone else. Most information comes from the folks wanting to build these power stations, you know, kind of like the "fox in the hen house" deal. And with this big business comes lots of promises of great sounding things, but we have all seen big businesses come and go and their promises broken.

Recently it has been publicized that the town of Barre, in Orleans County, will see 33 of these 700-foot wind turbines constructed. The Barre town board has declared that wind turbines will have little or no impact on the local environment or wildlife. Wonder how many of those board members have formal wildlife management education?

I'm concerned about this whole "deal" in Barre because the turbine field starts about one mile from the state Oak Orchard Wildlife Management Area. That's 2,500 acres of rich wetland environment set aside for the benefit of wildlife and the enjoyment of many types of outdoor enthusiasts. It's also one of the three original eagle hacking (raising young eagles in captivity and then releasing them into the wild) sites that brought back the bald eagle from the brink of extinction in New York state, as well as the osprey — and where there presently are two active eagle nests and several osprey nests. Where hundreds of thousands of waterfowl stop to rest during their spring and fall migrations. Where sandhill cranes, which just moved into this area in recent years, now nest. Where uncommon species such as the black tern, short-eared owl, Least Bitterns and American Bitterns roam. Where untold numbers of people come to see the marvel of nature.

Then we have another 11,000 acres of federal refuge (Iroquois) and 5,684 acres in the state Tonawanda WMA that start only 5 miles away from this future industrial wind development.

The Oak Orchard and Tonawanda WMAs and the Iroquois refuge are considered some of the most diverse wetlands in the state. Thirty-three mammoth wind turbines covering roughly 165 acres of bird air space: What are we thinking?

I spend a lot of time (every day, especially early mornings and early evenings) out and about in these areas with my camera photographing nature. I've always been oriented to nature and in all my years (too many now!) I have witnessed many things that most people never will.

One of the marvels I see is masses of migrating waterfowl flying out from the refuges while they are here in search of food in the surrounding farm lands. They fly low and they progressively move farther and farther from the refuge areas as they clean up the harvested drop fields nearby (20 miles away is not uncommon). Sometimes their attention is diverted by other things, like other birds in near collisions or predator species like eagles coming for them. I see eagles, hawks and vultures searching the land below for food, their attention not always fixed on what may be coming suddenly from above.

Many of the things I have seen make me question what effects these wind turbines will have on wildlife. There really hasn't been a lot of serious surveying done on that question. What about birds that migrate at night? What about bat migration? How much disturbance to nesting birds might there be? What happens when these tall monsters go bad, or turn out to be not such a good idea after all? Can a bird dodge a blade that's spinning 200 mph?

Another point: Who is pushing all these "save the planet" things in New York state? Why, it's our famous Governor who was recently caught lying to us about COVID-19 and is facing many inappropriate activity accusations! Could this big push to "save the planet" be another big scam to create wealth for some people?

Remember when DDT was the greatest thing in the world to get rid of those nasty insects? Or, how Agent Orange was going to win the war for us in Vietnam? How Round Up solved all our bad-plant problems? Remember how we went from paper bags to plastic bags to save trees? Wildlife and people have been paying for those loosely studied things for years since they occurred.

Not everything is as it seems — or as we have been told. Enjoy what nature has given us while you can.

Doug Domedion, outdoorsman and nature photographer, resides in Medina.

'net zero carbon'

continued from page 5

power plant fleet and is currently constructing new coal plants with a total capacity of 36.6 gigawatts (GW); it has another 29.3 GW in the pipeline.

India is also upping its reliance on that other bugbear of the Green Monarchy – crude oil, a very important commodity for the Indian economy. The world's third largest oil importer, whose trucking industry almost exclusively rolls on petroleum products, is now buying oil from Guyana and Brazil. The post-COVID recovery is being slowed by rising oil prices, so diversification of supply is vital.

Moreover, says oil minister Dharmendra Pradhan, Africa too has "a central role" in aiding India's quest to further diversity its sourcing of crude oil, liquefied natural gas, and other petroleum and energy products, "largely due to its proximity and the absence of any choke points in trans-shipments." These new African (and South American) oil markets are crucial to India's economy, notes Jayaraj.

Meanwhile, India's response to the Bloomberg reporters' virtue signaling was to extend deadlines by up to three years for coal-fired power plants to install Flue Gas Desulphurization (scrubber) units that cut emissions of sulfur dioxides and other pollutants. Utilities that miss even these delayed targets could continue operations after paying a penalty. India's power ministry explained that this action is intended to avoid immediate increases in electricity prices.

As Jayaraj concludes, India's openness to new oil producers and push to expedite coal-mining are sending a clear signal: India's leaders are more concerned about the economic well-being of their citizens than about pleasing bureaucrats and stuffed-shirt billionaires living in luxury thousands of miles away. That has to hurt their egos – and underscore the insanity and futility of net-zero quests by the US, EU and other nations.

Trump Charges Podesta, Abedin with Treason and Crimes Against Children

By Michael Baxter, 'Real Raw News' -April 6, 2021

On Easter Sunday Donald J. Trump invoked the Insurrection and Patriot Acts to order the arrest of two of Hillary Clinton's co-conspirators, John Podesta, her former campaign manager, and Huma Abedin, Clinton's former political advisor and alleged lover.

A confidential source involved in Trump's agenda to overthrow the Deep State and return America to the people provided RRN exclusive details on the shocking arrests.

At noon Sunday, Donald J. Trump contacted Gen. Richard D. Clarke, Commander of U.S. Special Operations Command, and asked that two Special Forces teams launch simultaneous incursions against Podesta, at his Friendship Village home in MD., and Abedin at her parents' house near Lansing, MI.

"Trump obtained valid intelligence proving that they'd be at those locations. He picked Easter Sunday because, he felt, it was the best day to catch them in a lull. Podesta was at home with his wife, and Abedin having Easter lunch at her parents. Why Huma, a Muslim, was celebrating Easter we don't know. But Trump trusted the intel," our source said.

At 2:00 p.m., one Special Forces Detachment surveilled the Abedin home in the Old Everett subdivision of Lansing. As the family inside the home enjoyed a cooked goose dinner, elements of the 3rd Special Forces Group stealthily approached the 5,000 sq. ft. villa and readied an assault.

"From what we know, part of the team took up sniper positions near the front door, while others breached the rear and hurled flashbang grenades into the house, stunning and deafening everyone inside. Abedin's parents collapsed in fear, while Huma started grousing about how she was protected and they couldn't do this to her. They shackled her. They told the parents to keep quiet or else they'd be next," our source said.

Special Forces took Abedin to a secure holding facility in south Florida, our source added.

A parallel infiltration in Maryland surprised Podesta and his wife, Mary. Unlike the Abedins, the Podestas had hired private security to defend their estate, but Special Forces silently subdued two armed guards who were patrolling the perimeter of the Podestas' mansion.

When Special Forces stormed the house, interrupting the Podestas' meal, John Podesta reportedly dropped to his knees and began sobbing and quaking like an animal, crying out, "Oh, God, please no. This wasn't supposed to happen. I didn't mean to do it."

"The cowardly criminal's crimes finally caught up with him. He knew what was coming and broke down in tears. The Special Forces guys took him and his wife. Because apparently she is complicit in his crime, and she could've warned the others, the ones who are next. This is a major blow to the Deep State's morale. Soon, their crimes will be laid bare," our source said.

Specific charges against Abedin and Podesta are detailed on sealed indictments in Trump's possession. Trump has charged both Podesta and Abedin with treason, not to mention crimes against countless children. Our source said the exact nature of those crimes will remain confidential until Abedin and Podesta stand before their respective military tribunals to answer for horrific charges so shocking, they could rip open the fabric of society.

"The military will decide their fate, as it will Hillary's," our source said.

Hillary Clinton's military tribunal is scheduled for April 8, at GITMO.

John Podesta and Huma Abedin

cont. from page 19

A confidential source familiar with Trump's plan to drain the swamp and restore American prosperity to the people told RRN that U.S. Special Forces operating on Trump's authority conducted simultaneous "nab and grab" missions to apprehend Clinton's co-conspirators. Trump picked Easter Sunday to arrest the traitors because he believed it to be the best day to catch them unaware and at home, our source added.

Trump's tactical expertise paid dividends.

At approximately 2:00 p.m., a Special Forces detachment out of Fort Bragg captured Abedin at her parents' home near Lansing, Michigan, where the family had gathered for Easter dinner. Although Abedin is a radical Islamic Jihadist with obvious ties to the Muslim Brotherhood, she spent her political years pretending to be a Christian.

"Trump learned Abedin would be at her parents' house for Easter. As you know, Clinton is already at GITMO awaiting trial. She's given up a lot of info, including on Abedin—she's allegedly revealed that she and Abedin partook in Adrenochrome infusions from Haitian children. When Navy Seals captured Clinton, they found evidence of this on her laptops, and now her own words have incriminated her and her criminal conspirators," our source said.

As Huma Abedin was arrested and escorted to a clandestine holding facility in south Florida, a simultaneous offensive was made against John Podesta at his springtime home in the outskirts of Bethesda, MD. Special Forces Operators of the 3rd Special Forces Group descended on his Friendship Village home and used non-lethal force to subdue two bodyguards protecting Podesta and his wife, Mary.

A preliminary report said that U.S. forces suffered no casualties.

Moreover, it's understood that Donald J. Trump had cleared the operation with General Gen. Richard D. Clarke, Commander of U.S. Special Operations Command.

This is a developing story. More details as they arrive.

Flood Plains

cont. from page 19

infrastructure and businesses.

Despite the all the planners with their rules, the pressure of people plus a bit of corruption has always resulted in population clustering on fertile flood plains and deltas beside scenic rivers. London, Paris, Rome, St Louis, Montreal, New Orleans, Brisbane and most other cities were built beside rivers. There is no point trying to stop or reverse this tide of history but those who choose to build or live on flood plains must bear the costs of the occasional flood.

Community groups will always help those stricken by floods but taxpayers and insurers should not be forced to subsidise the insurance and damage costs for those who choose to live in risky places - their choice, their risk, their cost. Naturally insurance for flood-prone property will be expensive or not available – a clear message for those with ears to hear.

More cautious people build on the hills and leave the flood plains for floods, farms, trees, market gardens and grass. Rational town planning would require sellers and developers to provide accurate flood maps to buyers, and councils should paint flood levels on power poles.

See the picture: Flood plains are for floods:

https://saltbushclub.com/wp-content/uploads/2021/03/flood-plains.jpg

There are few risk-free home sites. Those who build in thick bush or neglect cool-season burn-offs will inevitably suffer from bushfires; those who build on flood plains will be flooded; those who locate near fault zones will occasionally be shaken by earthquakes; those who build near the sea risk cyclones, giant waves and tsunamis; and those who farm the rich volcanic soil near "dormant" volcanoes risk sudden burial under ash and lava.

The old railway engineers soon learned to build their lines above most flood levels wherever possible. So a useful rule is: don't build essential infrastructure below the railway lines.

If you choose to locate on a flood plain, be prepared to pay higher insurance costs. And if you build your house there, build it on stilts, like this:

https://saltbushclub.com/wp-content/uploads/2021/03/queenslander.jpg

Rather than wasting billions on futile efforts to change global climate, governments should spend those billions on flood-proofing their railways, bridges, airports, roads and electricity supply.

And they should build more dams and weirs to conserve water and moderate floods.

Muslim Report: France

cont. from page 14

Barnabas-AID, on the same day, there was a Muslim shouting "Allah Akbar" and threatening passengers with "a gun" in Avignon.

According to the UK Guardian, on the same day, October 29th, there was a knife attack inside the French Consulate in Saudi Arabia. The Saudi's have condemned the attack as to "contravene all religions" but such a statement is a lie. Islam is out to conquer the world, by Jihad. Mecca is its capital, Saudi is its home turf, and the Saudi government uses its oil wealth to promote Wahabbi Islam around the world. According to the French Embassy, "The French consulate general in Jeddah this morning was subjected to a knife stabbing incident targeting a security guard – an employee of a private security company – and immediately the Saudi security forces arrested the perpetrator," it said. "The security guard was taken to a hospital, and his health condition remains stable."

On November 11th, 2020, according to the New York Times, "An explosion wounded at least three people on Wednesday in an attack on a ceremony organized by the French consulate to commemorate the end of World War I in a non-Muslim cemetery in Jeddah, Saudi Arabia, officials said."

The UK Guardian asserts, "Anti-French sentiment has been high across many Muslim countries this week owing to the French president Emmanuel Macron's perceived attacks on French Muslims and support for the right to caricature the prophet Muhammad." Muslims are affirmative action brat-babies who riot when they are not being catered to fast enough.

The Milwaukee County Constitution Party asserts that the proper response to a man on a knife rampage is two rounds shot into his chest and one in the head. If you are not carrying, then pick up something that gives you a reach advantage and bash his brains in with it. If that sounds rough, it is called self-defense, and anyone on murder spree has forfeited his right to civility from his victims. What will happen to such monsters when they are destroyed? Their souls will go hell, and lefties will cry crocodile tears over the criminal while ignoring the victims, or blaming Christianity for the crimes of Islam. But maybe more innocent people will be spared if these terrorists see that the people have preserved their will to fight back.

BIDEN'S ACCOMPLISHMENTS

FINALLY, SOMEONE POSTED Biden's 47 years of accomplishments.

This says it ALL!
It's a good - quick read.
Joe Biden's Political Career – by year:
1973 Biden enters politics...
1974
1975
1 976
1977 *Biden fights to keep schools segregated because in his own words, "allowing blacks to integrate would create a racial jungle" Fact check me.
1978
1979
1980
1981
1982
1983 *BIDEN Taxes Social Security
1984
1985
1986
1987
1988 *Ran for president but had to end his campaign after getting busted for plagiarism.
1989
1990
1991
1992
1993 *BIDEN Taxes Social Security, AGAIN*
1994 *Biden writes the "Stop and Frisk" law which is what blacks blame for "systemic racism" today.
This law took millions of black men from their homes and transplanted them into prison. Way to go Joe.
This was Biden's biggest accomplishment in 47 years of elected office. Fact check me, it's true.
1995
1996
1997 Hang on, not yet...
1998
1999
2000
2001
2002
2003 Still nothing...
2004
2005
2006
2007
2008 *Calls Obama the first "articulate" and "clean" mainstream African-American.
2009
2010
2011
2012 Nope, nothing yet...
2013
2014
2015
2016
2017
2018
2019
2020: NOW HE'S READY TO FIX THE COUNTRY.

New insults of real Americans from totalitarians...

Prophecy with wise words attached !

1. "Those who hammer their guns into plows will plow for those who do not." ~Thomas Jefferson

2. "Those who trade liberty for security have neither." ~ John Adams

3. Free men do not ask permission to bear arms

4. An armed man is a citizen. An unarmed man is a subject.

5. Only a government that is afraid of its citizens tries to control them.

6. Gun control is not about guns; it's about control.

7. You only have the rights you are willing to fight for.

8. Know guns, know peace, know safety. No guns, no peace, no safety.

9. You don't shoot to kill; you shoot to stay alive.

10. Assault is a behavior, not a device.

11. 64,999,987 firearms owners killed no one yesterday.

12. The United States Constitution (c) 1791. All Rights Reserved.

13. The Second Amendment is in place in case the politicians ignore the others.

14. What part of 'shall not be infringed' do you NOT understand?

15. Guns have only two enemies; rust and politicians.

16. When you remove the people's right to bear arms, you create slaves.

17. The American Revolution would never have happened with gun control.IF YOU AGREE, PASS THIS 'REFRESHER' ON TO TEN FREE CITIZENS.
"I love this country, it's the government I'm afraid of."

One Nation Under God

'Jesus First': Anna Wilson Helps Stanford Women Win First NCAA Championship in 29 Years

By CBN News Contributor

"You can do all things! Jesus You always come through." -Anna Wilson, tweet[Faithwire.com] The Stanford University women's basketball team defeated Arizona Sunday night 54-53 in the women's NCAA finals. (Screengrab image)

The Cardinals' victory was the first NCAA women's championship title for the school in 29 years.

One of the team's leaders is Anna Wilson, the sister of Seattle Seahawks quarterback Russell Wilson. But with all of her success on the court, the Pac-12 Co-Defensive Player of the Year has shown she realizes all of her accomplishments are through Jesus Christ. She even has Colossians 3:23 listed in her Twitter bio.

Candace Cameron Bure Admits COVID Exposed Her 'Faults', Forced Her Family to Face the Stuff They'd Been Avoiding

The Scripture from the Bible's New Testament reads:

"And whatsoever ye do, do it heartily, as to the Lord, and not unto men."

Before the championship game, Wilson took the time to send a tweet to her followers about Christ..."You can do all things! Jesus you always come through," she wrote.

Wilson shared with ESPN last April how her Christian faith helps keep her disciplined and how it helped her define success.

"When things aren't going my way and it's tough on the court, I always whisper, 'He must increase, I must decrease,'" Wilson wrote in a first-person article. "That's John 3:30. I wrote that on my left wrist and 'joy' on the top of my left hand before every practice. For me, that means minimizing myself — to put others first, and Jesus first, is more important than anything else. My faith has helped me with my definition of success. It's definitely not all about me."

She also added she looks on her time at Stanford as a gift that has brought her even more than an education.

"With all the ups and downs of being a student-athlete at the most competitive academic and athletic university, I've learned more than I could've imagined," Wilson said. "I wouldn't change a thing. I have friends and mentors for a lifetime. When I lost a dad, God provided an entire family that helped me become the woman I am today. I know my dad would be proud."

Her brother Russell also sent out a special tweet to his sister.

"Drive. Will. Passion. Energy. You've earned it all through hard work, leadership, prayer, & immeasurable Faith. I Love You Anna Wilson.

I Love You Champ. @a_willy03≤

Baylor Team Praises God for First NCAA Championship Win

By Drew Parkhill, CBN News, Apr 6, 2021

"I'm not trying to preach a prosperity Gospel, but um, our Lord and Savior, I say it all the time, you know, He gets us through everything ... He's with us wherever we go, and He just sustained us, He brought us together, He brought the team together." -Jared Butler

[CBN News] The Baylor Bears are celebrating today after winning their first-ever NCAA men's college basketball championship. (Screengrab image)

The private Christian university easily beat previously undefeated Gonzaga on Monday night 86 to 70.

The Baylor team thanked God in prayer in a circle on the court after the game.

The Bears' Jared Butler was named the Final Four most outstanding player. He gave thanks to the Lord after the game.

"I'm not trying to preach a prosperity Gospel, but um, our Lord and Savior, I say it all the time, you know, He gets us through everything," Butler said. "Jesus Christ, man, He's the truth, and He was with us tonight, He's with us all season, He's with us wherever we go, and He just sustained us, He brought us together, He brought the team together."

Baylor Coach Scott Drew also honored the hard work of his players saying, "Our team has been special. Last two years, winningest team in the Power Five. We've been really, really good, and they're even better people."

Baylor is a Christian university, and Drew has been guided by his own Christian faith, having accepted Christ at a young age.

The Baylor program was a mess when Drew took over in 2003. But he built it back up using a culture called "JOY", which stands for "Jesus, Others, Yourself".

"We're so blessed to have unbelievable upperclassmen and leadership. But we play with a culture of joy," Coach Drew said after the big win.

Drew guides the team by his own faith, having accepted Christ at a young age. He grew up in a Christian family and regularly attended church as a child.

Working at a Christian college has allowed Drew to be more outspoken about his religious beliefs.

"The Spirit works differently with different people, but I feel comfortable talking about my faith in public and what Jesus Christ has done in my life," he said in a Fall 2020 Sports Spectrum Magazine feature.

Additionally, Baylor's faith-focused program values the importance of having a cheerful heart and sharing God's word together.

"We've been a Christ-centered program since we've been here," Drew explained. "Everybody comes in, spiritually, at different levels, but the great thing is that everybody's open to growing. Each and every year, we want our players to grow academically and athletically, but also spiritually and in character."

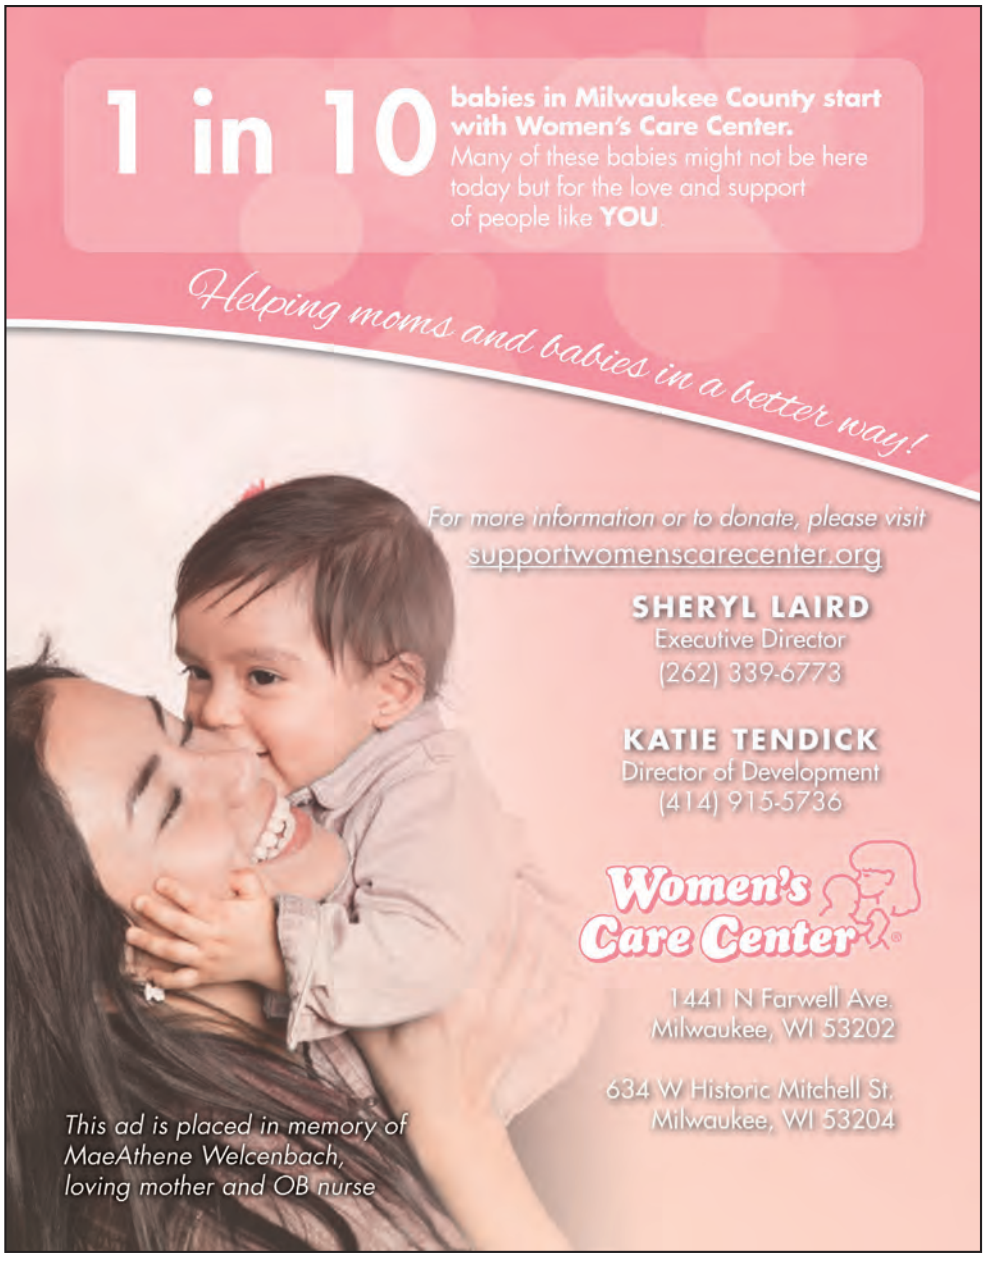
Basketball practices begin and end with a prayer. Players can also attend a Bible study and chapel service.

Drew told Sports Spectrum, "We do a players' Bible study and a chapel service like the NBA. Those are great times for all of us to grow spiritually. And then we begin practice in prayer, and close practice in prayer, and just make sure that these guys get the full thing of everything that we do."

Drew added that the team's mission remains the same: to honor God and give Him all the glory in everything they do, regardless of their victories or defeats.

"I think the biggest thing is modeling after Jesus. He was a servant leader. And with us, hopefully, and prayerfully, its humility, it's serving our players and helping them achieve their goals and dreams, not only on the court but in life and in the classroom," Drew told CBN Sports a few years ago.

"If I didn't have a relationship with Jesus Christ our Lord and Savior, I'd be a mess and the highs would be too high and the lows would be too low. I mean we're all competitors. We want to win. But at the end of the day, I'm coaching for an audience of One," he said.



VOICE OF JERUSALEM

Biden's Anti-Israel 'Point Man' Behind Plan to Fund Terrorists

By Daniel Greenfield

"I was inspired by the Palestinian intifada," Hady Amr wrote a year after September 11 while working with an anti-Israel group.

A few years later, the Beirut-born extremist had become an advisor on Muslim relations to the World Economic Forum before heading up Brookings' Doha Center for Qatar. The tiny Islamic tyranny is allied with Iran, Al Qaeda, and the Muslim Brotherhood. It's a backer of Hamas.

The Obama administration appointed Amr as the Deputy Head of USAID's Middle East Bureau which put him in a key position to direct taxpayer money from an organization already notorious for funding pro-terrorist and anti-Israel groups.

A decade after Amr had responded to the death of a Hamas leader by ranting that "there will be thousands who will seek to avenge these brutal murders of innocents", the Obama administration made him a Deputy to its Special Envoy for Israeli Palestinian negotiations.

Amr decamped back to Brookings during the Trump administration, becoming one of Biden's big bundlers, joining his transition team and getting picked as Deputy Assistant Secretary of State for Near Eastern Affairs. Within two decades of praising the intifada against Israel and a decade of working for a think-tank deeply compromised by its pro-Hamas regime sponsor, the foreign radical had climbed to a pole position in setting the Biden administration's policy on Israel.

Politico described Amr as "the key U.S. official dealing with the Israeli-Palestinian issue." The Times of Israel called him, "Biden's point-man on the Israeli-Palestinian conflict."

Biden's point man didn't waste much time.

On February 1st, it was reported that Amr had spoken with Minister Hussein al-Sheikh of the Palestinian Authority. Al-Sheikh, a member of the PLO Central Council and of the Central Committee of the Fatah Party, had praised the top terrorist Hmeid family as a "fighting family" whose members had murdered at least 10 Israelis, and promised aid to it.

In response to efforts to get the PLO to stop rewarding terrorists, Al-Sheikh had declared that, "If we have one dollar, we will spend it on the families of our martyrs and prisoners."

Al-Sheikh described his conversation with Amr as "positive."

In late February, Al-Sheikh wrote a letter to Hady Amr claiming that all the terrorists, including Hamas, had committed to "peaceful popular resistance" against Israel. A Hamas official however boasted that, "the Palestinian voter will vote for those who trampled the Zionists' heads underfoot, and wrote the loftiest verses of victory with their blood and body parts."

On March 1, Hady Amr and his team delivered their memo, The US Palestinian Reset and the Path Forward, which called for resuming aid to the terrorists, abandoning pro-Israel moves by the Trump administration, and doubling down on building a terrorist state inside Israel.

A militant anti-Israel activist from Beirut was not only defining an anti-Israel foreign policy, but, as foreign policy expert Elliot Abrams noted, the memo repeatedly used British spellings for words like "programmes", "normalise", and "emphasise", driving home the point that Americans were no no longer in charge of their own foreign policy even on a simple linguistic level.

The memo's reset "with the Palestinian people and leadership" was advanced by Amr's contacts with figures in the PLO and Fatah terrorist movements, and called for an immediate resumption of the foreign aid pipeline to the terrorist territories, including UNRWA, which has served as a front for Hamas operations, beginning in late March or early April".

The timing held up perfectly with the State Department announcing approximately $250 million in aid to the terrorist territories in early April closely following the timetable of Amr's memo.

"Israel strongly opposes renewing funding for UNRWA, an anti-Semitic agency that incites against Israel," Ambassador Gilad Erdan, Israel's representative to the UN, tweeted.

Ambassador Erdan was understating the case. UNRWA schools are routinely staffed by Hamas supporters who preach the murder of Jews and Americans, and has produced top terrorists. Members of the Muslim Brotherhood terrorist group working for UNRWA have used its facilities and signage to transport weapons, and terrorists, and to store and fire rockets at Israel.

The funding is "consistent with who we are as a people. It also happens to be what's consistent with what's in our interest," Ned Price, Biden's State Department spokesman, falsely claimed.

The $150 million for UNRWA is crucial to the strategy of restoring funding to the terrorist areas without violating the Taylor Force Act. The law, named after an American veteran murdered in Israel by an Islamic terrorist funded and celebrated by the PLO, banned further foreign aid to the terrorist entity until it stopped funding terrorists. The PLO, including Abbas and his pal, Al-Sheikh, have vehemently refused to stop funding further terrorist attacks.

The Biden administration is claiming that its funding is indirect and therefore not in violation of the Taylor Force Act even though it blatantly violates its intent. But this is an administration packed full of Obama vets who oversaw shipments of foreign currency to Iran on unmarked cargo planes in order to dodge the law against providing money to Iran's terrorists.

Aside from UNRWA, much of the remaining cash will be funneled through USAID.

"Given the absence of USAID activity in recent years, engaging civil society actors will be critical to regaining trust and goodwill with Palestinian society," a congressional notification argued.

Why does the United States have to pay to regain the "trust and goodwill" of terrorists?

When Price was asked about a Government Accountability Office (GAO) report that showed that USAID had not vetted the second level of grants for terrorist connections, he retorted that it "found no cases of U.S. funding going to parties, providers on the ground who failed vetting."

Of course that's the point. There was no vetting and therefore there were no findings.

The Biden administration has made it clear that it intends to violate the Taylor Force Act up and down while claiming ignorance, and insisting that it's not in violation because it claims it isn't.

And the result will be more terrorism.

According to Adam Kredo of the Washington Free Beacon, a non-public State Department report admitted that the PLO had spent $342 million on subsidies for terrorists and their families. In this non-public report, the State Department admitted that the PLO was funding terrorists, that it had not ended calls for violence, and was not committed to peace, but that the aid would come anyway.

The cash began flowing even before Biden officially took office. The $2.3 trillion omnibus bill Congress passed in December which was sold as coronavirus relief for small businesses, also included $250 million in funding for "Palestinian dialogue and business" over 5 years.

The Alliance for Middle East Peace was the heaviest lobbyist for the pigout. ALLMEP is an alliance of many anti-Israel organizations, some strongly supportive of BDS.

The $250 million will be administered by USAID which already funds anti-Israel groups.

All those millions are a down payment on a bigger set of Biden administration anti-Israel goals.

The Amr memo had also called for, "rolling back certain steps by the prior administration that bring into question our commitment or pose real barriers to a two-state solution, such as country of origin labelling". These are euphemisms for reversing the Trump administration's pro-Israel measures such as ending the punitive restrictions on Israeli agriculture and villages.

The ban on labeling products imported to the United States as 'Made in Israel' that are grown by Jewish farmers in those parts of Israel claimed by the Islamic terrorists is likely next on the agenda. The Amr memo had also implicitly called for reopening the PLO office in Washington D.C. and a diplomatic mission to the PLO in Jerusalem. Those are also likely to come.

The Trump administration had created pro-Israel facts on the ground, while the Biden administration intends to restore the anti-Israel status quo in foreign policy one step at a time.

After first emphasizing coronavirus relief, the cash spigot has been turned on for UNRWA and USAID. The money and the political support that comes with it will bolster the PLO and advance anti-Israel narratives, including BDS, in Israel and around the world at taxpayer expense.

But the worst is yet to come.

And the Al-Sheikh letter falsely claiming that Hamas is ready to be peaceful is the next step.

In 2019, Amr had co-written an article arguing that the United States should lay "out the terms of a three-way Hamas-Israel-PA/PLO deal now" and "build an international consensus around it."

That would mean the Biden administration and its point man developing a plan to legitimize Hamas, gaining the support of the Europeans and the Russians, and then imposing it on Israel.

Hamas, according to Amr and his co-authors, would offer Israel nothing more than a cease-fire, while Israel would have to "incentivize" by "offering a significant move" on peace.

That means more territorial concessions, including Jerusalem, and freeing more terrorists.

A year after 9/11, Hady Amr, Biden's future "point man", wrote that he was "inspired by the Palestinian intifada." And through him the Biden administration is also inspired by the intifada and its war to destroy Israel and turn it into another Islamic territory ruled by the terrorists.

John Brennan Sent to GITMO

By Michael Baxter, Real Raw News,
March 28, 2021

Deep State operative and former CIA director John Brennan has a new home at the Guantanamo Bay detention center in Cuba, Real Raw News has learned.

A source familiar with Trump's war on the Deep State and mission to invalidate a fraudulent presidential election told RRN that U.S. military assets loyal to Trump arrested Brennan on 25 March and flew him to GITMO for processing. He will be held as an enemy combatant while awaiting a military tribunal, our source said.

"I can't speak to the logistics of the operation or where Brennan was nabbed, but Trump had gathered overwhelming information proving beyond a shaadow of a doubt that Brennan had committed atrocities against the American people. And we're talking about a lot more than his role in the whole Russian collusion scandal," our source said.

While serving as Obama's CIA director, Brennan orchestrated the assassination of five American patriots, all civilians, who were outspoken opponents of then-President Obama's mass surveillance programs. Their names, and actions to earn a spot on Obama's notorious enemies list, are contained in a sealed indictment and will be made public once Trump retakes the White House, our source said.

All five deaths were made to appear natural; they died of myocardial infarction, or heart attacks.

And there's more.

In the last days of his presidency, Donald J. Trump came into possession of a CIA document authorizing a drone strike on a family of five who lived on a 40-acre homestead in the remote Colorado wilderness. Though much of the document was redacted, John Brennan's signature was not. Our source could not confirm whether the operation took place, but the document's existence was proof enough for Trump to indict Brennan on conspiracy to commit murder. The names of the family, which include children ages 6, 9, and 12, are listed on a sealed indictment.

"From what I know, Obama wanted the family, at least the husband and wife, dead because they belonged, allegedly, to a northwest militia movement that very critical of the administration. Why Trump didn't discover this until the end of his term—I don't know. But, man, was this the smoking gun he wanted on Brennan. Trump thinks there's probably a whole lot more of these kind of documents buried deep in the CIA's secret archives," our source said.

In closing, our source said Trump is escalating his battle against Deep State agents who are eager to strip Americans of the rights and freedoms they hold dear, and that each person

arrested will eventually appear before a military tribunal to answer for his—or her—crimes.

"Obama's time is coming, too. It's just a matter of time," our source said.

SAVE AMERICA
PRESIDENT DONALD J. TRUMP

REPUBLICAN PARTY OF WISCONSIN

President Trump Endorses Senator Johnson!

- April 8, 2021 -

Endorsement of Senator Ron Johnson

Even though he has not yet announced that he is running, and I certainly hope he does, I am giving my Complete and Total Endorsement to Senator Ron Johnson of Wisconsin. He is brave, he is bold, he loves our Country, our Military, and our Vets. He will protect our Second Amendment, and everything else we stand for. It is the kind of courage we need in the U.S. Senate. He has no idea how popular he is. Run, Ron, Run!

- President Donald J. Trump

Did you see that President Trump endorsed Senator Ron Johnson yesterday? Even though Senator Johnson hasn't announced his intentions about 2022, President Trump hopes that he will run for re-election to the United States Senate.

President Trump is casting his support behind Senator Johnson because he knows that he stands up for Wisconsin families with toughness, courage and grit. He is fighting tirelessly for us in the U.S. Senate, including most recently leading the charge in calling out Joe Biden's failures on the border crisis.

We couldn't agree more with President Trump. There is no one who fights harder for Wisconsinites than Senator Ron Johnson!

Clinton Military Tribunal: Day 2

By Michael Baxterr, Real Raw News
April 12, 2021.

Hillary Clinton's military tribunal resumed on Monday morning at Guantanamo Bay, following a 72-hour pause that began Thursday afternoon when a disheveled Clinton collapsed to the floor in what seemed like an epileptic seizure. But on Saturday GITMO's medical staff gave Clinton a clean bill of health, saying she had likely feigned illness to stall the trial.

At 10:00 a.m. Monday, Vice Adm. John G. Hannink's opening comments derided Clinton's behavior.

"Hillary Rodham Clinton knows she is guilty. Otherwise, she wouldn't pretend to be sick to delay these proceedings. This woman is thoroughly evil, corrosive, bereft of morality," Vice Adm. Hannink said, addressing the three-officer tribunal that will ultimately decide Clinton's fate.

Veering from the context of Thursday's interrogation, Vice Adm. Hannink leveled accusations against Clinton that we at RRN had not heard before. He produced documentation connecting Clinton and the Clinton Foundation to the disappearance of 23 Haitian and 3 American children who were presumably orphaned in the aftermath of a massive earthquake that killed an estimated 220,000 people on the island nation in 2010.

Since the incident involved American citizens, it was the tribunal's duty to judge Clinton's culpability in the matter, Vice Adm. Hannink said.

The three American children—ages 4,7 and 12—belonged to a humanitarian couple doing missionary work on the island nation. A day after the quake, Haitian authorities found the children and the corpse of an older Haitian woman, apparently the babysitter, in the rubble of their collapsed home. The parents had been volunteering at a village west of Port-au-Prince, near the quake's epicenter.

Haitian authorities spent a week searching in vain for the missing parents, but concluded the couple must have perished in the quake.

Vice Adm. Hannink told the Tribunal that on Jan 24, 2010 Hillary Clinton, then Secretary of State, contacted Haitian President René Préval and said she wished to aid parentless children whose lives the earthquake had shattered.

Vice Adm. Hannink showed the tribunal a chain of email correspondence between Clinton and Préval. In one letter, Clinton stated explicitly that the overture to care for orphaned children was made on behalf of the Clinton Foundation, not the U.S. government, and that the Foundation would find foster homes for the children until such time they could be properly adopted.

"Préval belived she was sincere, and when he told her about the 3 American kids, she told him she'd take care of them too. But Clinton had ulterior motives, the evidence shows. She never ran this through the State Department, of which she was in charge. No, the Clinton Foundation chartered a boat to get those kids off the island, a boat that picked them up in Haiti and then vanished from the face of the planet. Neither State nor Health and Human Services has any record of the American children setting foot on American soil. Not the Haitian children, either. Where did they all go? Did they vanish into thin air? You made the offer, your name is on the emails, your Foundation arranged transportation. Do you have anything to say?"

Clinton, who hadn't uttered a word since the proceedings began, said, "You'd have to ask the Clinton Foundation."

"You are the Foundation," Vice Adm. Hannink retorted. "The Clinton Foundation is a foundation in name only. You and it are the same entity."

Clinton sat bone still and lapsed into silence.

Then Vice Adm. Hannink introduced a material witness, former Clinton Foundation accountant Bethany Greenbaum, who via ZOOM testified to Clinton's criminality. The Clinton Foundation, she said, had paid IYC Yacht Solutions, which runs from Spain, $3,000,000 for a week-long yacht rental. Greenbaum called the 145' Bliss a "party boat" with hot tubs, a sauna, and a loaded minibar.

"I know the ship was delivered to Miami with orders to sail for Haiti. Beyond that, I don't know anything, and I was smart enough to not ask questions," Greenbaum told the tribunal.

"But the defendant, Hillary Rodham Clinton, approved the expenditure?" Vice Adm. Hannink asked.

"Yes. Yes, she did," Greenbaum replied.

After a brief recess, Vice Adm. Hannink said Italian authorities and IYC Yachting refused to cooperate in the military's investigation of Hillary Clinton.

"We thought they'd help, but they didn't. The defendant was a powerful and protected woman. Consider this: The average cost for renting a luxury yacht for a week in 2010 was, give or take, 300 grand. Yet Clinton paid ten times that much. Why? She certainly isn't charitable, or a philanthropist. She paid for their silence, that's what she bought for $3,000,000," Vice Adm. Hannink postulated.

"Hillary Clinton in 2010 was arguably the most powerful woman on the planet. As Secretary of State, she wielded practically limitless power. As a government official, she could've rescued those children using official channels, but she was running a side business. The military argues that Clinton trafficked those children for personal profit, probably much more than the $3,000,000 she spent getting them out of Haiti. This is what you three officers must decide," Vice Adm. Hannink continued.

He ordered recess until 2:30 p.m.
